Synopsis. Demonstrates how nonresponse in sample surveys and censuses can be handled by replacing each missing value with two or more multiple imputations. Clearly illustrates the advantages of modern computing to such handle surveys, and demonstrates the benefit of this statistical technique for researchers who must analyze them.

Multiple Imputation for Nonresponse in Surveys (Wiley ...

Abstract: We outline a framework for multiple imputation of nonignorable item nonresponse when the marginal distributions of some of the variables with missing values are known. In particular, our framework ensures that (i) the completed datasets result in design-based estimates of totals that are plausible, given the margins, and (ii) the completed datasets maintain associations across

variables as posited in the imputation models.

Multiple Imputation for Nonignorable Item Nonresponse in ...

Demonstrates how nonresponse in sample surveys and censuses can be handled by replacing each missing value with two or more multiple imputations. Clearly illustrates the advantages of modern computing to such handle surveys, and demonstrates the benefit of this statistical technique for researchers who must analyze them. Also presents the background for Bayesian and frequentist theory.

Multiple Imputation for Nonresponse in Surveys - Sugden ...

Multiple imputation (Rubin, 1987) was rst conceived as a tool that statistical agen- cies could use to handle nonresponse in large data sets that are disseminated to the public. The basic idea is for the statistical agency to simulate values for the missing data repeatedly by sampling from predictive distributions of the missing values.
