Great Traditions in Ethics

An Introduction

Business Ethics

Identity, Character, and Morality

Essays in Moral Psychology MIT Press

Many philosophers believe that normative ethics is in principle independent of psychology. By contrast, the authors of these essays explore the interconnections between psychology and moral theory. They investigate the psychological constraints on realizable ethical ideals and articulate the psychological assumptions behind traditional ethics. They also examine the ways in which the basic architecture of the mind, core emotions, patterns of individual development, social psychology, and the limits on human capacities for rational deliberation affect morality.

The Ethics of Care

Personal, Political, and Global Oxford University Press on Demand

An exploration of the moral theory examines the characteristics of the ethics of care, discussing the feminist roots of this moral approach, what is meant by "care," and the potential of the ethics of care for dealing with social issues.

The Arabic Lexicographical Tradition

From the 2nd/8th to the 12th/18th Century BRILL

A comprehensive and methodologically sophisticated history of Arabic lexicography, this book examines the aims, range, and approaches of the most important writings and writers of lexica specialized in specific topics and multi thematic thesauri, and the lexica arranged according to roots.

Dostoevsky and Kant

Dialogues on Ethics Rodopi

"In this book, Evgenia Cherkasova brings the philosopher Kant and the novelist Dostoevsky together in conversations that probe why duty is central to our moral life. She shows that just as Dostoevsky is indebted to Kant, so Kant would profit from the deeply philosophical narratives of Dostoevsky, which engage the problem of evil and the claims of human community. She not only produces a novel reading of Dostoevsky, but also guides us to later, often neglected Kantian texts. This study is written with scholarly care, penetrating analysis, elegance of style, and moral

urgency: Cherkasova writes with both mind and heart." Emily Grosholz, Professor of Philosophy, The Pennsylvania State University Social Philosophy (SP), in conjunction with the Center for Ethics, Peace and Social Justice, SUNY Cortland, explores theoretical and applied issues in contemporary social philosophy, drawing on a variety of philosophical traditions.

Design and Destiny

Jewish and Christian Perspectives on Human Germline Modification *MIT Press*

Scholars discuss the genetic modification of embryonic cells from the viewpoints of traditional Jewish and Christian teaching, considering both the possible therapeutic benefits of this technology and moral concerns about its implementation. We are approaching the day when advances in biotechnology will allow parents to "design" a baby with the traits they want. The continuing debate over the possibilities of genetic engineering has been spirited, but so far largely confined to the realms of bioethics and public policy. *Design and Destiny* approaches the question in religious terms, discussing human germline modification (the genetic modification of the embryonic cells that become the eggs or sperm of a developing organism) from the viewpoints of traditional Christian and Jewish teaching. The contributors, leading religious scholars and writers, call our attention not to technology but to humanity, reflecting upon the meaning and destiny of human life in a technological age. Many of these scholars argue that religious teaching can support human germline modification implemented for therapeutic reasons, although they offer certain moral conditions that must be met. The essays offer a surprising variety of opinions, including a discussion of Judaism's traditional presumption in favor of medicine, an argument that Catholic doctrine could accept germline modification if it is therapeutic for the embryo, an argument implying that "traditional" Christian teaching permits germline modification whether for therapy or enhancement, and a "classical" Protestant view that germline modification should be categorically opposed. Contributors Lisa Sowle Cahill, Nigel M. de S. Cameron, Ronald Cole-Turner, Amy Michelle DeBaets, Celia Deane-Drummond, Elliot Dorff, H. Tristram Engelhardt, Jr., Thomas A. Shannon, James J. Walter

Sophie's World

A Novel About the History of Philosophy *Farrar, Straus and Giroux*

One day Sophie comes home from school to find two questions in her mail: "Who are you?" and "Where does the world come from?" Before she knows it she is enrolled in a correspondence course with a mysterious philosopher. Thus begins Jostein Gaarder's unique novel, which is not only a mystery, but also a complete and entertaining history of philosophy.

Business Ethics: Ethical Decision Making and Cases *Cengage Learning*

This accessible, applied text covers the complex environment in which managers confront ethical decision making. Using a managerial framework, the authors address the overall concepts, processes, and best practices associated with successful business ethics programs--helping students see how ethics can be integrated into key strategic business decisions. The Seventh Edition incorporates comprehensive and rigorous updates that reflect the ever-increasing academic and governmental attention being given to this area. The textbook program provides an abundance of real-world examples and cases, as well as

exercises, simulations, and practice tests that provide plenty of opportunity for students to master the text material. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The Daily Stoic

366 Meditations on Wisdom, Perseverance, and the Art of Living *Penguin*

From the team that brought you *The Obstacle Is the Way* and *Ego Is the Enemy*, a beautiful daily devotional of Stoic meditations—an instant Wall Street Journal and USA Today Bestseller. Why have history's greatest minds—from George Washington to Frederick the Great to Ralph Waldo Emerson, along with today's top performers from Super Bowl-winning football coaches to CEOs and celebrities—embraced the wisdom of the ancient Stoics? Because they realize that the most valuable wisdom is timeless and that philosophy is for living a better life, not a classroom exercise. *The Daily Stoic* offers 366 days of Stoic insights and exercises, featuring all-new translations from the Emperor Marcus Aurelius, the playwright Seneca, or slave-turned-philosopher Epictetus, as well as lesser-known luminaries like Zeno, Cleanthes, and Musonius Rufus. Every day of the year you'll find one of their pithy, powerful quotations, as well as historical anecdotes, provocative commentary, and a helpful glossary of Greek terms. By following these teachings over the course of a year (and, indeed, for years to come) you'll find the serenity, self-knowledge, and resilience you need to live well.

Nietzsche's Ethics and his War on 'Morality' *OUP Oxford*

Simon May presents a fresh and wide-ranging critique of Nietzsche's famous attack on traditional morality, and of his controversial ethics of 'life-enhancement'. He reveals Nietzsche as both revolutionary and conservative—as one who repudiates traditional 'moral' conceptions of God, guilt, asceticism, pity, and truthfulness, and yet retains a demanding ethics of discipline, conscience, 'self-creation', generosity, and honesty. In particular, May shows how Nietzsche rejects truthfulness as an unconditional value and yet celebrates it as one of his own highest values, whose worth is determined by who is pursuing it, for what end, and when in their lives. May is strongly critical of various aspects of Nietzsche's thought—his self-defeating conception of justice, his assumption that 'life-enhancement' necessarily demands world-affirmation, his ambition to de-deify the world, and the impossible and undesirable autonomy of the Übermensch. But Nietzsche is shown to offer modernity key elements of a coherent ethic, and to provide moral philosophy with important tools for reassessing some of its most cherished values and concepts. May's book will be illuminating not just for scholars and students of Nietzsche, in philosophy, literature, and history of ideas, but for anyone interested in current debates about ethics and modernity.

The Philosophy Book

Big Ideas Simply Explained *Penguin*

What existed before the Universe was created? Where does self-worth come from? Do the ends always justify the means? The *Philosophy Book* answers the most profound questions we all have. It is your visual guide to the fundamental nature of existence, society, and how we think. Discover what it means to be free, whether science can predict the future, or how language shapes our thoughts. Written in plain English, with concise explanations of branches of philosophy such as metaphysics and ethics, it untangles complicated theories and makes sense of abstract concepts. It is an ideal reference whether you're a student or a general reader, with simple explanations of big ideas, including the four noble truths, the soul, class struggle, moral purpose, and good and evil. If you're curious about the deeper questions in life, *The Philosophy Book* is both an invaluable reference and illuminating read.

Ethical Considerations for Research on Housing-Related Health Hazards Involving Children *National Academies Press*

Ethical Considerations for Research on Housing-Related Health Hazards Involving Children explores the ethical issues posed when conducting research designed to identify, understand, or ameliorate housing-related health hazards among children. Such research involves children as subjects and is conducted in the home and in communities. It is often conducted with children in low-income families given the disproportionate prevalence of housing-related conditions such as lead poisoning, asthma, and fatal injuries among these children. This book emphasizes five key elements to address the particular ethical concerns raised by these characteristics: involving the affected community in the research and responding to their concerns; ensuring that parents understand the essential elements of the research; adopting uniform federal guidelines for such research by all sponsors (Subpart D of 45 CFR 46); providing guidance on key terms in the regulations; and viewing research oversight as a system with important roles for researchers, IRBs and their research institutions, sponsors and regulators of research, and the community.

The Trap *Faber & Faber*

Dan Billany's *The Trap*, first published in 1950, still stands - in the opinion of M.R.D. Foot - as 'one of the most powerful English novels to come out of the [Second World War].' It echoes the wartime experiences of its author, who is believed to have died in 1943 while on the run from an Italian POW camp, but not before entrusting the manuscripts of *The Trap* to safekeeping. The book's narrator, army lieutenant Michael Carr, tells of his early years in Cornwall, of the girl he met and loved there, and of the hard times her family endured between the wars. These troubles and joys give way to the tragedy of war, and the book's narrative becomes one of comradeship, suspense and fighting in the North African desert. 'The Trap is an outstanding novel by a writer of natural genius... written with great force and honesty... profoundly impressive.' *Times Literary Supplement*

Bioethics

Ancient Themes in Contemporary Issues *MIT Press*

Contemporary bioethicists and scholars of ancient philosophy explore the import of classical ethics on such pressing bioethical concerns.

Ethics in Economics

An Introduction to Moral Frameworks *Stanford Economics and Finance*

In *Ethics in Economics*, Jonathan B. Wight provides an overview of the role that ethical considerations play in economic debates. Whereas much of the field tends to focus on welfare outcomes, Wight calls for a deeper examination of the origin and evolution of our moral norms. He argues that economic life relies on three interrelated ethical systems: outcome-based, duty- and rule-

based, and virtue-based. Integrating contemporary theoretical and applied research on ethics within a historical framework, Wight provides a thorough and accessible outline of all three schools, explaining how they fit or contrast with the economic welfare model. The book then uses these conceptual underpinnings to examine a range of contemporary topics, such as the 2008 financial crisis, the moral limits to markets, the findings of experimental economics, and the nature of economic justice. Wight's analysis is guided by the innovative concept of ethical pluralism—the recognition that each system has appropriate applications, and that no one prevails. He makes the case that considering a wider moral framework, rather than concentrating on utility maximization, can lead to a richer understanding of human behavior and better policy decisions. An incisive overview in a blossoming area of interest within Economics, this book is ideal for undergraduates or uninitiated readers who seek an introduction to this topic.

Linguistic Bodies

The Continuity between Life and Language *MIT Press*

A novel theoretical framework for an embodied, non-representational approach to language that extends and deepens enactive theory, bridging the gap between sensorimotor skills and language. *Linguistic Bodies* offers a fully embodied and fully social treatment of human language without positing mental representations. The authors present the first coherent, overarching theory that connects dynamical explanations of action and perception with language. Arguing from the assumption of a deep continuity between life and mind, they show that this continuity extends to language. Expanding and deepening enactive theory, they offer a constitutive account of language and the co-emergent phenomena of personhood, reflexivity, social normativity, and ideality. Language, they argue, is not something we add to a range of existing cognitive capacities but a new way of being embodied. Each of us is a linguistic body in a community of other linguistic bodies. The book describes three distinct yet entangled kinds of human embodiment, organic, sensorimotor, and intersubjective; it traces the emergence of linguistic sensitivities and introduces the novel concept of linguistic bodies; and it explores the implications of living as linguistic bodies in perpetual becoming, applying the concept of linguistic bodies to questions of language acquisition, parenting, autism, grammar, symbol, narrative, and gesture, and to such ethical concerns as microaggression, institutional speech, and pedagogy.

In the Light of Evolution

Volume X: Comparative Phylogeography *National Academies Press*

Biodiversity-the genetic variety of life-is an exuberant product of the evolutionary past, a vast human-supportive resource

(aesthetic, intellectual, and material) of the present, and a rich legacy to cherish and preserve for the future. Two urgent challenges, and opportunities, for 21st-century science are to gain deeper insights into the evolutionary processes that foster biotic diversity, and to translate that understanding into workable solutions for the regional and global crises that biodiversity currently faces. A grasp of evolutionary principles and processes is important in other societal arenas as well, such as education, medicine, sociology, and other applied fields including agriculture, pharmacology, and biotechnology. The ramifications of evolutionary thought also extend into learned realms traditionally reserved for philosophy and religion. The central goal of the In the Light of Evolution (ILE) series is to promote the evolutionary sciences through state-of-the-art colloquia-in the series of Arthur M. Sackler colloquia sponsored by the National Academy of Sciences-and their published proceedings. Each installment explores evolutionary perspectives on a particular biological topic that is scientifically intriguing but also has special relevance to contemporary societal issues or challenges. This tenth and final edition of the In the Light of Evolution series focuses on recent developments in phylogeographic research and their relevance to past accomplishments and future research directions.

Questions of Life and Death

Readings in Practical Ethics OUP USA

Featuring sixty-seven classic and contemporary selections, Questions of Life and Death: Readings in Practical Ethics is ideal for courses in contemporary moral problems, applied ethics, and introduction to ethics. In contrast with other moral problems anthologies, it deals exclusively with current moral issues concerning life and death, the ethics of killing, and the ethics of saving lives. By focusing on these specific questions--rather than on an unrelated profusion of moral problems--this volume offers a theoretically unified presentation that enables students to see how their conclusions regarding one moral issue can affect their positions on other debates.

Continental Philosophy: A Very Short Introduction OUP Oxford

Simon Critchley's Very Short Introduction shows that Continental philosophy encompasses a distinct set of philosophical traditions and practices, with a compelling range of problems all too often ignored by the analytic tradition. He discusses the ideas and approaches of philosophers such as Kant, Hegel, Nietzsche,

Husserl, Heidegger, Sartre, Habermas, Foucault, and Derrida, and introduces key concepts such as existentialism, nihilism, and phenomenology by explaining their place in the Continental tradition. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Bauhaus Futures MIT Press

Essays, photo-essays, interviews, manifestos, diagrams, and a play explore the varied legacies, influences, and futures of the Bauhaus. What would keep the Bauhaus up at night if it were practicing today? A century after its founding by Walter Gropius in Weimar, Germany, as an "experimental laboratory of the future," who are the pioneering experimentalists who reinscribe or resist Bauhaus traditions? This book explores the varied legacies, influences, and futures of the Bauhaus. Many of the animating issues of the Bauhaus—its integration of research, teaching, and practice; its experimentation with materials; its democratization of design; its open-minded, heterogeneous approach to ideas, theories, methods, and styles—remain relevant. The contributors to Bauhaus Futures address these but go further, considering issues that design has largely ignored for the last hundred years: gender, race, ethnicity, class, sexuality, and disability. Their contributions take the form of essays, photo-essays, interviews, manifestos, diagrams, and even a play. They discuss, among other things, the Bauhaus curriculum and its contemporary offshoots; Bauhaus legacies at the MIT Media Lab, Black Mountain College, and elsewhere; the conflict between the Bauhaus ideal of humanist universalism and current approaches to design concerned with race and justice; designed objects, from the iconic to the precarious; textile and weaving work by women in the Bauhaus and the present day; and design and technology. The Family in Crisis in Late Nineteenth-Century French Fiction Cambridge University Press

The Family in Crisis in Late Nineteenth-Century French Fiction, first published in 1999, focuses on a key moment in the construction of the modern view of the family in France. Nicholas White's analysis of novels by Zola, Maupassant, Hennique, Bourget and Armand Charpentier is fashioned by perspectives on a wide cultural field, including legal, popular and academic discourses on the family and its discontents. His account encourages a close rereading of canonical as well as overlooked texts from fin de siècle France. What emerges between the death of Flaubert in 1880 and the publication of Bourget's Un divorce in 1904 is a series of Naturalist and post-Naturalist representations of transgressive behaviour in which tales of adultery, illegitimacy, consanguinity, incest and divorce serve to exemplify and to offer a range of nuances on the Third Republic's crisis in what might now be termed 'family values'.

Qualitative Research & Evaluation Methods

Integrating Theory and Practice *SAGE Publications*

Drawing on more than 40 years of experience conducting applied social science research and program evaluation, author Michael Quinn Patton has crafted the most comprehensive and systematic book on qualitative research and evaluation methods, inquiry frameworks, and analysis options available today. Now offering more balance between applied research and evaluation, this Fourth Edition of *Qualitative Research & Evaluation Methods* illuminates all aspects of qualitative inquiry through new examples, stories, and cartoons; more than a hundred new summarizing and synthesizing exhibits; and a wide range of new highlight sections/sidebars that elaborate on important and emergent issues. For the first time, full case studies are included to illustrate extended research and evaluation examples. In addition, each chapter features an extended "rumination," written in a voice and style more emphatic and engaging than traditional textbook style, about a core issue of persistent debate and controversy.

Laws *Aeterna Press*

THE genuineness of the Laws is sufficiently proved (1) by more than twenty citations of them in the writings of Aristotle, who was residing at Athens during the last twenty years of the life of Plato, and who, having left it after his death (B. C. 347), returned thither twelve years later (B. C. 335); (2) by the allusion of Isocrates—writing 346 B. C., a year after the death of Plato, and probably not more than three or four years after the composition of the Laws—who speaks of the Laws and Republics written by philosophers (??? ??? ?????????); (3) by the reference (Athen. 226 A) of the comic poet Alexis, a younger contemporary of Plato (fl. B. C. 356–306), to the enactment about prices, which occurs in Laws xi. 917 B foll., viz. that the same goods should not be offered at two prices on the same day; (4) by the unanimous voice of later antiquity and the absence of any suspicion among ancient writers worth speaking of to the contrary: for it is not said of Philippus of Opus that he composed any part of the Laws, but only that he copied them out of the waxen tablets, and was thought by some to have written the *Epinomis* (Diog. Laert. iii. 25). *Aeterna Press*

Culture and Nurturance

The Aesthetic Life of School Children, Pre K-12th Grade *Booksurge Publishing*

"This work of Dr. Aziza Braithwaite Bey is evidence of her life long insistence that the contributions of ancient and global cultures be represented in every possible discourse where issues of human development and human contribution are discussed. First, as an internationally trained fashion designer; second, as a master of museology and costume curating and; third as a doctor of diversity in cultural education teaching in the Graduate School of Arts and Social Sciences at Lesley University, Dr. Bey's work now gives instructors a manual that introduces a plethora of comparative cultural material and evidence into the classroom—and into our thinking. Through well researched examples, her book carefully insists that both instructor and student begin to think of humanity outside of their own parochial setting. Through lessons on food, clothing and ritual, this manual purposefully underscores a deep appreciation of world-wide culture. In this era of globalization, it becomes particularly important that we manage to identify distinctions, still, in ethnic form and culture—so that no modern effort toward homogeneity obscures those particular ways and means that varieties of cultures have solved similar problems. This manual gently helps the user to create an understanding that the diverse range of human genius is the

greatest contribution to civilization, world-wide. In this manual Bey celebrates that genius...of humanity to demonstrate how similar problems can be solved in acutely distinct ways while maintaining similarities of import across of the range of possibility. To this end Dr. Bey's work and her insistence on cultural inclusion demand both our respect and applause." Aristotle's Way

How Ancient Wisdom Can Change Your Life *Penguin*

From renowned classicist Edith Hall, *ARISTOTLE'S WAY* is an examination of one of history's greatest philosophers, showing us how to lead happy, fulfilled, and meaningful lives Aristotle was the first philosopher to inquire into subjective happiness, and he understood its essence better and more clearly than anyone since. According to Aristotle, happiness is not about well-being, but instead a lasting state of contentment, which should be the ultimate goal of human life. We become happy through finding a purpose, realizing our potential, and modifying our behavior to become the best version of ourselves. With these objectives in

mind, Aristotle developed a humane program for becoming a happy person, which has stood the test of time, comprising much of what today we associate with the good life: meaning, creativity, and positivity. Most importantly, Aristotle understood happiness as available to the vast majority of us, but only, crucially, if we decide to apply ourselves to its creation--and he led by example. As Hall writes, "If you believe that the goal of human life is to maximize happiness, then you are a budding Aristotelian." In expert yet vibrant modern language, Hall lays out the crux of Aristotle's thinking, mixing affecting autobiographical anecdotes with a deep wealth of classical learning. For Hall, whose own life has been greatly improved by her understanding of Aristotle, this is an intensely personal subject. She distills his ancient wisdom into ten practical and universal lessons to help us confront life's difficult and crucial moments, summarizing a lifetime of the most rarefied and brilliant scholarship.

Decolonizing Methodologies

Research and Indigenous Peoples *Bloomsbury Publishing*

'A landmark in the process of decolonizing imperial Western knowledge.' Walter Mignolo, Duke University To the colonized, the term 'research' is conflated with European colonialism; the ways in which academic research has been implicated in the

throes of imperialism remains a painful memory. This essential volume explores intersections of imperialism and research - specifically, the ways in which imperialism is embedded in disciplines of knowledge and tradition as 'regimes of truth.' Concepts such as 'discovery' and 'claiming' are discussed and an argument presented that the decolonization of research methods will help to reclaim control over indigenous ways of knowing and being. Now in its eagerly awaited second edition, this bestselling book has been substantially revised, with new case-studies and examples and important additions on new indigenous literature, the role of research in indigenous struggles for social justice, which brings this essential volume urgently up-to-date.

Do and Dare

A Brave Boy's Fight for Fortune

"If we could only keep the post office, mother, we should be all right," said Herbert Carr, as he and his mother sat together in the little sitting room of the plain cottage which the two had occupied ever since he was a boy of five."Yes, Herbert, but I am afraid there won't be much chance of it.""Who would want to take it from you, mother?" "Men are selfish, Herbert, and there is no office, however small, that is not sought after."
