Cybersecurity and cryptography are separate entities but are still connected. Cybersecurity refers to keeping data secure, while cryptography is one method used to protect sensitive information. These two are similar in that aspect of data security. However, cybersecurity and cryptography are

two terms that one cannot use interchangeably.

Cybersecurity vs Cryptography: Do You Know the Difference ...

Cryptography and Network Security. Cryptography historically dealt with the construction and analysis of protocols that would prevent any third parties from reading a private communication between two parties. In the digital age, cryptography has evolved to address the encryption and decryption of private communications through the internet and computer systems, a branch of cyber and network security, in a manner far more complex than anything the world of

cryptography had seen before the ...
