A functional specification is a formal document used to describe a product's intended capabilities, appearance, and interactions with users in detail for software developers. The functional specification is a kind of guideline and continuing reference point as the developers write the programming code .

What is a Functional Specification Document?

A specification is a document that describes in words what cannot be visualised or explained on a drawing or model. How should specifications be structured? The structuring of specifications will vary from project to project but should reflect the work packages on a particular project and any sub-contracts.

What is a specification for construction? | NBS

A functional specification in systems

engineering and software development is a document that specifies the functions that a system or component must perform. The documentation typically describes what is needed by the system user as well as requested properties of inputs and outputs. A functional specification is the more technical response to a matching requirements document, e.g. the Product Requirements Document "PRD". Thus it picks up the results of the requirements analysis stage. On more
