If you require a refresher of how to perform a neurological examination of the upper limb, here is our super awesome Geeky Medics OSCE guide. Dermatomes and Myotomes. The sensory supply to the upper limb can be broken down into dermatomes (the area supplied by each spinal nerve root) and peripheral nerve territories. The best way to learn these, especially the complicated supply to the hand, is literally to draw it on yourselves or on

each other!

Nerve Supply to the Upper Limb | Geeky Medics

These provide skeletal support as well as being the site of origin and attachment for the many muscles to act as leverage points. The joints of the upper limb are found between some of these bones and the muscles crossing them allow us to orient these joints. The nerves of the upper limb arise from a complex arrangement of nerve fibers known as the brachial plexus; These nerves give sensation to our upper limb, as well as innervating the muscles, allowing us to move them at will.
