9781461268161 - Biomaterials Science and Biocompatibility

Biocompatibility is the ability of an implant material to function in vivo without eliciting detrimental local or systemic responses in the body. 8 Prior to their use in human fracture fixation, biomaterials undergo tissue and animal testing to determine their safety and efficacy. Biomaterials that elicit little or no host response such as cobalt-chromium metallic alloys can be thought of as inert materials.

Biocompatibility - an overview | ScienceDirect Topics

There are many definitions of biomaterials and biocompatibility but the one given by Williams remains widely accepted in science and medicine: a biomaterial is 'any substance (other than a drug) or combination of substances synthetic or natural in origin, which can be used for any period of time, as a whole or part of a system which treats, augments, or replaces tissue, organ, or function of the body' (Williams 1987). Historically biomaterials have been classed as biocompatible on the ...
