The 20D ignores all the other buttons except the shutter once it goes to sleep a minute after you ignore it. The only way to get the 20D to respond to other keys, like playback or MENU, is to tap the shutter button to wake it up. I don't bother turning it OFF, since it doesn't use the batteries while sleeping.

Canon 20D User's Guide - Ken Rockwell

Personally I never use green/magenta

bias anyway. Canon also provides more adjustment points, although I find Nikon's +/- 3 settings more than enough. I prefer the Nikons here. CUSTOM WB is how you set the 20D's white balance to a white or gray card or Expodisc. It's complicated, unlike Canon's compact cameras.
