Allocation concealment, prediction and selection bias

Fayers and Sprangers pointed out that the observed but unmeasured covariates (such as a subjective overall assessment of patient health) can be quite predictive of even hard outcomes, but for our purposes these will be considered interchangeably with those “phantom” covariates that are not observed at all yet still figure so prominently in the detection of selection bias , . We shall want to balance all types of covariates, and also treatment group sizes, but we shall not consider the ...
