As I mentioned in the five steps at the beginning of my post, a Chinese character also tells us how to pronounce the character, which is an essential part of learning to read. Once you've built up several

characters in your 'bank,' you'll soon be able to take a good stab at 'guessing' the pronunciation of a character.

How to Read Chinese Characters: A ... - Written Chinese

Yes, it is. QR Codes can store data as binary and within that data you can encode in whatever character set you require. If you did encode in Chinese, when reading such data back, the reader must process it using the same character set it was encoded against. If this is done correctly, Chinese or Korean characters can be recognized correctly.
