ultrasound features of metastases in the ovaries differ depending on the origin of the primary tumor. Authors A. C. Testa, G. Ferrandina, D. Timmerman, L. Savelli, M. Ludovisi, C. Van Holsbeke, M. Malaggesse, G. Scambia, L. Valentin

Imaging in Gynecological Disease

Transvaginal and transabdominal ultrasound are the workhorse modalities for the evaluation of pelvic pain when a gynecological etiology is suspected. Transvaginal and/or transabdominal ultrasound are both considered equally appropriate when evaluating pelvic pain; this is true whether the serum beta-hCG is positive or negative and whether a gynecologic or nongynecologic etiology is suspected.
