Plant breeding is the business and science of crop improvement. It is an innovation-based sector, focused on developing plants better adapted to human needs. The demand for new varieties of agricultural and horticultural crops, adapted to our unique growing conditions, is never ending, driven by the challenges of new pest and disease pressures, weather patterns and changing market requirements.

Plant Breeding Matters

Plant breeding provides the essential platform for competitive and sustainable UK agriculture, delivering major advances in the yield, quality and performance of our key arable crops.

Fair Play

The British Society of Plant Breeders (BSPB) has appointed Samantha Brooke as its new chief executive effective from July 1st. She succeeds Dr Penny Maplestone, who left the BSPB after 22 years - the last 16 as chief executive - last month to set up her own garden design and maintenance business. Ms Brooke has over 17 years commercial experience in the UK and European plant breeding and seed supply sectors.

Sam Brooke to lead the BSPB - AgriTrade News

Modern plant breeding is an increasingly sophisticated, high-investment business. The majority of commercial plant breeding takes place within the private sector. Plant breeding work is also carried out in a limited number of research institutes. Plant breeders are employed in a range of areas including:
