Probabilistic risk analysis (Chapter 1)

- Probabilistic ...

Probabilistic risk assessment is a systematic and comprehensive methodology to evaluate risks associated with a complex engineered technological entity or the effects of stressors on the environment for example. Risk in a PRA is defined as a feasible detrimental outcome of an activity or action. In a PRA, risk is characterized by two quantities: the magnitude of the possible adverse consequence, and the likelihood of each occurrence of each consequence. Consequences are expressed numerically
