Engineering Geology And Hydrogeology Third

Elective modules allow for the creation of an individual study profile in the areas of engineering geology and hydrogeology. Engineering geology, as a field of geotechnical engineering, provides the link between the disciplines of geosciences based on natural science, and engineering sciences. Engineering geologists deal with the investigation of natural underground phenomena as well as the associated development of derived models that respond to technical questions concerning such phenomena.

Engineering Geology: Engineering Geology is somewhat different to applied geology in that additional knowledge, education and training is required in the problems of the ground for engineering works, site investigation methods and the classification and behaviour of soils and rocks in relation to civil engineering, and therefore includes practical knowledge of soil mechanics, rock mechanics and hydrogeology (fluid mechanics).

Engineering Geology and Hydrogeology - UP

This, in terms of engineering geology, inevitably leads to volume change of ground, changes in the corrosiveness of the subsurface, and seepage problems (such as seasonal perched systems and waterlogging), requiring mitigation. In terms of hydrogeology and hydrology, the vadose zone links the subsurface water cycle with the surface. This directly determines groundwater recharge (preferential through complex soil-rock systems), advection rates and attenuation of contaminants, and greater ...
