Volcanology

A volcanogenic lake is a lake formed as a result of volcanic activity. They are generally a body of water inside an inactive volcanic crater but can also be large volumes of molten lava within an active volcanic crater and waterbodies constrained by lava flows, pyroclastic flows or lahars in valley systems. The term volcanic lake is also used to describe volcanogenic lakes, although it is more commonly assigned to those inside volcanic craters.

Volcanic Lakes-Springer - IAVCEI Commission on Volcanic lakes

Volcano lakes can occur in a few different ways. The first would simply be a crater filled with water. Another way that these lakes can form is when a volcano erupts such large amounts of magma that the emptied magma chamber beneath it collapses under the weight of the earth, thus forming a large indentation called a caldera, which eventually fills with water.
