Solutions To Problems In Goldstein Classical Mechanics ...

In classical mechanics the behaviour of a dynamical system can be described geometrically as motion on an "attractor." The mathematics of classical mechanics effectively recognized three types of attractor: single points (characterizing steady states), closed loops (periodic cycles), and tori (combinations of several cycles).

Classical mechanics | physics | Britannica

Classical mechanics is a physical theory describing the motion of macroscopic objects, from projectiles to parts of machinery, and astronomical objects, such as spacecraft, planets, stars and galaxies. For objects governed by classical mechanics, if the present state is known, it is possible to predict how it will move in the future and how it has moved in the past. The earliest development of classical mechanics is often referred to as Newtonian mechanics. It consists of the physical concepts e
