Manual multi-port valves are most commonly used. They are called manual because the lever at the top has to be turned to select any of the processes performed by them. The valves are either connected to top or the side of the filter, depending on the model chosen.

Manual Multiport valves | Astralpool

Filters. The filtration system is one of the most important components of a pool. It is the main way of cleaning the water as it removes impurities and makes the water suitable for swimming. There are different types of filter: sand or glass filters (the most popular as they require little maintenance), cartridge filters (replaceable, with very low water consumption) and diatomaceous earth filters (with a high performance filtration system even removes dirt not visible to the naked eye).
