Genesis Of The Big Bang

The authors of this volume have been intimately connected with the conception of the Big Bang model since 1947. Following the late George Gamov's ideas in 1942 and more particularly in 1946 that the early universe was an appropriate site for the synthesis of the elements, they became deeply involved in the question of cosmic nucleosynthesis and particularly the synthesis of the light elements.

In contrast, the big bang model claims that the universe and earth formed over billions of years. Genesis tells us that God created the stars on the fourth day—three days after the earth was created. In contrast, the big bang model claims that stars existed billions of years before the earth.

The Big Bang | Answers in Genesis

The “big bang” is a story about how the universe came into existence. The “big bang” is a story about how the universe came into existence. It proposes that billions of years ago the universe began in a tiny, infinitely hot and dense point called a singularity. This singularity supposedly contained not only all the mass and energy that would become everything we see today, but also

“space” itself.

Does the Big Bang Fit with the Bible? | Answers in Genesis

However, at Answers in Genesis we have long recognized the incompatibility of the big bang with the creation account of Genesis 1. Therefore, we understand that the big bang model is just one of the many failed attempts of men to rationalize the existence of the world apart from God.
