Coming from an Economics and Finance background, algorithms, data structures, Big-O and even Big Data were all too foreign to me. The terms file system, throughput, containerisation, daemons, etc. had little to no meaning in my vocabulary. Here is my attempt to explain Big Data to the man on the street (with some technical jargon thrown in for context).

Dataism is a term that has been used to describe the mindset or philosophy created by the emerging significance of Big data. It was first used by David Brooks in The New York Times in 2013. More recently, the term has been expanded to describe what social scientist Yuval Noah Harari has called an emerging ideology or even a new form of religion, in which 'information

flow' is the 'supreme value'.
