Although swimming pools come in all shapes and sizes, nearly all pools function the same way to keep the water clean and chemically balanced. See how much you know about how swimming pools work by taking this quiz.

The Ultimate Swimming Pool Quiz | HowStuffWorks

To calculate the average depth, we do a simple 'average' calculation; Add the shallow depth + the deep depth, and then divide by 2. This formula will work only if the pool bottom has a constant slope - one angle from shallow to deep, as pictured here. The average depth of this pool is ____ + ____ ÷ 2 = ____.

Pool Certification Test Answers ? | Pool Operator Talk News

Test result looks purple or blue: This indicates that your pool water has a very high chlorine content. Discontinue use of chlorine until chlorine returns to normal, or use a chlorine neutralizer. Always tests too high: Repeated test results indicating that the pH in your pool water is high indicates a high total alkalinity. Add a pH decreaser to balance the total alkalinity.
