Design Like You Give a Damn [2]

Building Change from the Ground Up *Abrams*

Design Like You Give a Damn [2] is the indispensable handbook for anyone committed to building a more sustainable future. Following the success of their first book, Architecture for

Humanity brings readers the next edition, with more than 100 projects from around the world. Packed with practical and ingenious design solutions, this book addresses the need for basic shelter, housing, education, health care, clean water, and renewable energy. One-on-one interviews and provocative case studies demonstrate how innovative design is reimagining community and uplifting lives. From building-material innovations such as smog-eating concrete to innovative public policy that is repainting Brazil's urban slums, *Design Like You Give a Damn* [2] serves as a how-to guide for anyone seeking to build change from the ground up. Praise for *Design Like You Give a Damn* [2]: --StartFragment-- "The resourcefulness of the projects in the

book is inspiring, its information practical (see Stohr's chapter on financing sustainable community development) and its numerous factoids sobering." —TMagazine.blogs.NYTimes.com

The Architecture of Happiness *McClelland & Stewart*

Bestselling author Alain de Botton considers how our private homes and public edifices influence how we feel, and how we could build dwellings in which we would stand a better chance of happiness. In this witty, erudite look at how we shape, and are shaped by, our surroundings, Alain de Botton applies Stendhal's motto that "Beauty is the promise of happiness" to the spaces we inhabit daily. Why should we pay attention to what architecture has to say

to us? de Botton asks provocatively. With his trademark lucidity and humour, de Botton traces how human needs and desires have been served by styles of architecture, from stately Classical to minimalist Modern, arguing that the stylistic choices of a society can represent both its cherished ideals and the qualities it desperately lacks. On an individual level, de Botton has deep sympathy for our need to see our selves reflected in our surroundings; he demonstrates with great wisdom how buildings — just like friends — can serve as guardians of our identity. Worrying about the shape of our sofa or the colour of our walls might seem self-indulgent, but de Botton considers the hopes and fears we have for our homes at a new level of depth and insight. When

shopping for furniture or remodelling the kitchen, we don't just consider functionality but also the major questions of aesthetics and the philosophy of art: What is beauty? Can beautiful surroundings make us good? Can beauty bring happiness? The buildings we find beautiful, de Botton concludes, are those that represent our ideas of a meaningful life. The *Architecture of Happiness* marks a return to what Alain does best — taking on a subject whose allure is at once tantalizing and a little forbidding and offering to readers a completely beguiling and original exploration of the subject. As he did with Proust, philosophy, and travel, now he does with architecture.

Design Justice

Community-Led Practices to Build the Worlds We Need *MIT Press*

An exploration of how design might be led by marginalized communities, dismantle structural inequality, and advance collective liberation and ecological survival. What is the

relationship between design, power, and social justice? “Design justice” is an approach to design that is led by marginalized communities and that aims explicitly to challenge, rather than reproduce, structural inequalities. It has emerged from a growing community of designers in various fields who work closely with social movements and community-based organizations around the world. This book explores the theory and practice of design justice, demonstrates how universalist design principles and practices erase certain groups of people—specifically, those who are intersectionally disadvantaged or multiply burdened under the matrix of domination (white supremacist heteropatriarchy, ableism, capitalism, and settler colonialism)—and invites

readers to “build a better world, a world where many worlds fit; linked worlds of collective liberation and ecological sustainability.” Along the way, the book documents a multitude of real-world community-led design practices, each grounded in a particular social movement. Design Justice goes beyond recent calls for design for good, user-centered design, and employment diversity in the technology and design professions; it connects design to larger struggles for collective liberation and ecological survival.

Learn how to approach the problem of humanitarian design Understand the cultural factors that play into development Develop a new framework for planning post-disaster design See how humanitarian design is pushing the industry forward While still in college, students are being given the opportunity to directly participate in programmes that provide vital facilities for communities abroad. While these international initiatives remain largely ad hoc, this book provides parameters for engagement and establishes best practices for

approaching these projects with a global perspective. With expert insight and practical strategies on the ground, *Ground Rules in Humanitarian Design* is an essential resource for architects at any level.

Live Like You Give a Damn!

Join the Changemaking Celebration *Wipf and Stock Publishers*

Live Like You Give a Damn! declares the very good news that God is raising up a new generation, largely outside the church, to bring impressive change to the lives of our neighbors locally and globally by creating innovative forms of social enterprise and community empowerment. The even better news is that those of us within the church can

join this changemaking celebration and discover creative new ways God can use our mustard seeds to make a more remarkable difference than we ever imagined possible. In this book Tom Sine offers practical ways you can join those who are creating their best communities, their best world, and in the process their best lives. Sine shows that in a world changing at warp speed, following Jesus is a "design opportunity." It is not only an opportunity to design innovative ways to make a difference but also an opportunity to create lives with a difference, in the way of Jesus, that are simpler and more sustainable--and to throw better parties along the way. Why would anyone want to settle for less and miss the best?

Safe

Design Takes on Risk *The Museum of Modern Art*

This book presents a wealth of contemporary design products and prototypes from all over the world that address the issues of protection and security in our everyday lives. The objects are as diverse as our notions of safety and well-being: headgear designed to withstand either a fall from a bicycle or the blast of a bomb; prefabricated shelters for victims of earthquakes; self-defense and antitheft objects; clearly illustrated emergency instructions; de-mining equipment; and toys that help people with mental disabilities gain and maintain a sense of balance and identity. This broad array of

examples is accompanied by texts on the home as a safety nest, on automotive safety, on new materials and technologies, and on how architects and designers can provide support and guidance in situations of extreme emergency.

The Routledge Companion for Architecture Design and Practice

Established and Emerging Trends *Routledge*

The Routledge Companion for Architecture Design and Practice provides an overview of established and emerging trends in architecture practice. Contributions of the latest research from international experts examine external forces applied to the practice and discipline of architecture. Each chapter contains up-to-date and relevant information about select aspects of architecture, and the changes this information will have on the future of the profession. The Companion contains thirty-five chapters, divided into seven parts: Theoretical Stances, Technology,

Sustainability, Behaviorism, Urbanism, Professional Practice and Society. Topics include: Evidence-Based Design, Performativity, Designing for Net Zero Energy, The Substance of Light in Design, Social Equity and Ethics for Sustainable Architecture, Universal Design, Design Psychology, Architecture, Branding and the Politics of Identity, The Role of BIM in Green Architecture, Public Health and the Design Process, Affordable Housing, Disaster Preparation and Mitigation, Diversity and many more. Each chapter follows the running theme of examining external forces applied to the practice and discipline of architecture in order to uncover the evolving theoretical tenets of what constitutes today's architectural profession, and the tools that will be

required of the future architect. This book considers architecture's interdisciplinary nature, and addresses its current and evolving perspectives related to social, economic, environmental, technological, and globalization trends. These challenges are central to the future direction of architecture and as such this Companion will serve as an invaluable reference for undergraduate and postgraduate students, existing practitioners and future architects.

Eat Like You Give A Damn

Recipes for The New Ethical Vegan *Book Publishing Company*

Entrepreneurs and ethical vegans
Michelle Schwegmann and Josh Hooten

first satisfied their passion for saving animals by designing and selling a successful line of clothing that promoted cruelty-free ethics: *Herbivore*. Inspiring people to eat like they give a damn, Michelle and Josh share over 100 recipes for their favorite everyday vegan dishes, which they've tucked into an original book design that reflects their art and ethics. Their recipe list is anchored with a panoply of comfort foods, such as hot soups and chili, mac 'n'cheese, and sweet potato fries, all served up with a touch of whimsy. An Elvis Quesadilla with Maple-Yogurt Drizzle crosses paths with Praise Seitan Vegan Roast and Oma's Full of Beans. Roasted Beet Burgers sidle up to Only-Kale-Can-Save-Us-Now Salad and Pesto-Parmesan Corn on the Cob. With ample helpings of sass

and heart, the authors intersperse their recipes with treatises on why vegan and how vegan. In addition, the authors provide support for vegan parents of vegan children and anyone who wants to indulge in the meat- and cheese-based foods they grew up loving, without sacrificing any animals to enjoy them.

By Design

Ethics, Theology, and the Practice of Engineering *Wipf and Stock Publishers*

Both engineering and human living take place in a messy world, one chock full of unknowns and contingencies. "Design reasoning" is the way engineers cope with real-world contingency. Because of the messiness, books about engineering design cannot have "ideal solutions"

printed in the back in the same way that mathematics textbooks can. Design reasoning does not produce a single, ideally correct answer to a given problem but rather generates a wide variety of rival solutions that vie against each other for their relative level of "satisfactoriness." A reasoning process analogous to design is needed in ethics. Since the realm of interpersonal relations is itself a fluid and highly contingent real-world affair, design reasoning offers the promise of a useful paradigm for ethical reasoning. This volume undertakes two tasks. First, it employs design reasoning to illustrate how technological artifacts can be assessed for their inherent moral properties. Second, it uses the design paradigm as a means for bringing

engineering ethics into conversation with Christian theology in order to show how each can be for the other a catalyst for the revolutionary task of living by design.

Sustainable Graphic Design

Tools, Systems and Strategies for Innovative Print Design *John Wiley &*

Sons

The graphic artist's guide to sustainable design Graphic design is frequently thought of as a purely decorative effort. Yet these efforts can be responsible for shocking impacts on natural resources just to produce a barely-glanced-at catalog or mail piece. Sustainable Graphic Design: Tools, Systems, and Strategies for Innovative Print Design helps designers view graphic design as a holistic process. By exploring eco-conscious materials and production techniques, it shows designers how to create more effective and more sustainable designs. Sustainable Graphic Design opens your eyes to the bigger picture of design seen from the viewpoints of the audience, the creative vendor, their suppliers, and society as a

whole. Chapters are written by a wide range of sustainable design pioneers and practitioners—including graphic designers, creative managers, marketing consultants, environmentalists, researchers, and psychologists—giving you critical information on materials and processes. Case studies illustrate and tie concepts together. Sustainability isn't a fad or a movement; it's a long-term paradigm shift. With this forward-looking toolkit, you'll be able to infuse your work with sustainability systems thinking, empowering you to play your role in achieving a future where design and sustainability are natural partners.
