Case-Based Reasoning Technology | SpringerLink

Case-based reasoning (CBR) is a paradigm of artificial intelligence and cognitive science that models the reasoning process as primarily memory based. Case-based reasoners solve new problems by retrieving stored 'cases' describing similar prior problem-solving episodes and adapting their solutions to fit new needs.

Case-Based Reasoning Technology, From Foundations to ...

Case-based reasoning (CBR) is an experience-based approach to solving new problems by adapting previously successful solutions to similar problems. Addressing memory, learning, planning and problem solving, CBR provides a foundation for a new technology of intelligent computer systems that can solve problems and adapt to new situations.

What is Case-Based Reasoning (CBR)? Definition from WhatIs.com

Case-based Reasoning is one of the most successful applied AI technologies of recent years. Commercial and industrial applications can be developed rapidly, and existing corporate databases can be used as knowledge sources. Helpdesks and diagnostic systems are the most common applications. Case-based Reasoning (CBR) is based on the intuition that new problems are often similar to previously encountered problems and, therefore, that past solutions may be of use in the current situation.

Case-based Reasoning - University of Edinburgh

Case-based reasoning (CBR) is an artificial-intelligence problem-solving technique that catalogs experience into "cases" and correlates the current problem to an experience. CBR is used in many areas, including pattern recognition, diagnosis, troubleshooting and planning. These systems are easy to maintain in comparison to rule-based expert systems.

Definition of Case-based Reasoning (CBR) - Gartner ...

Case-based reasoning (CBR) is a relative newcomer to AI and is commonly described as an AI technology like the ones listed above. This paper will show, by examining four very different CBR applications, that CBR describes a methodology for problem solving but does not prescribe any specific technology.

Case-based reasoning is a methodology not a technology ...

Case-based reasoning, broadly construed, is the process of solving new problems based on the solutions of similar past problems. An auto mechanic who fixes an engine by recalling another car that exhibited similar symptoms is using case-based reasoning. A lawyer who advocates a particular outcome in a trial based on legal precedents or a judge who creates case law is using case-based reasoning. So, too, an engineer copying working elements of nature, is treating nature as a database of solutions

An Introduction to Case-Based Reasoning*

Case-Based Reasoning (CBR) is a relatively recent problem solving technique that is attracting increasing attention. However, the number of people with first-hand theoretical or practical experience of CBR is still small. The main objective of this review is to provide a comprehensive overview of the subject to people new to CBR.

Case-based reasoning: A review | The Knowledge Engineering ...

Case-based reasoning (CBR) can be viewed as experience mining, with analogical reasoning applied to problem-solution pairs. As cases are typically not identical, simple storage and recall of experiences is not sufficient, we must define and analyze similarity and adaptation.

Case-Based Reasoning - A Textbook | Michael M. Richter ...

She pioneered the computer reasoning method called case-based reasoning, a way of solving problems based on analogies to past experiences, and her lab emphasized case-based reasoning for situations of real-world complexity. In case-based reasoning, the results of previous cases are applied to new situations, cutting down the complexity of the reasoning necessary in later situations and allowing a problem solver to anticipate and avoid previously-made mistakes.
