The application of fuzzy logic principles in embedded systems enables solving problems that would

be difficult or even impossible to solve if mathematical models were used. The intuitive nature of the fuzzy-based system design saves engineers time and reduces costs by shortening product development cycles and making system maintenance and adjustments easier [2]

Introduction to Fuzzy Logic - Embedded.com

This paper describes the development of an embedded system for video de-interlacing. The algorithm for video de-interlacing uses three fuzzy logic-based systems to tackle three relevant features in video sequences. The proposed strategy implements the algorithm as an IP core on a FPGA-based embedded system. The paper details the proposed architecture

and the design methodology to develop it.
