## Central Nervous System Study Guide

The central nervous system (CNS) consists of the brain and the spinal cord. Early in its development, the CNS is a hollow tube with three interconnected chambers. During development, the chambers become the ventricles. (see below), and the tissue around them becomes the three major brain divisions Table 1. The brain.

## Central Nervous System (CNS) - CliffsNotes Study Guides

The spinal cord of the central nervous system is a white cord of tissue passing through the bony tunnel made by the vertebrae. The spinal cord extends from the base of the brain to the bottom of

the backbone. Three membranes called meninges surround the spinal cord and protect it. The outer tissue of the spinal cord is white (white matter), while the inner tissue is gray (gray matter).
