Credit Scoring Accion

This tool guide focuses on credit scores – a number that represents an assessment of the creditworthiness of a person, or the likelihood that the person will repay a loan. Financial institutions use scoring models to assess the credit risk of a borrower and aid in the credit evaluation processes. A score can be applied along the steps of the microfinance lending methodology, providing objective inputs to make the process more effective and enhance standards and controls.

In this episode, Zaydoon elaborates on his comments in a recent Fast Company article featuring RevolutionCredit, in which he explained that most credit scoring models that exist today, in the U.S. and globally, are transaction-data-based — meaning they are mostly backward-looking and result in a “negative selection” process. The RevolutionCredit model, on the other hand, allows financial institutions to look beyond past performance to gauge someone’s likelihood to pay a loan in the ...
