Statistical Learning Theory

Statistical learning theory is a framework for machine learning drawing from the fields of statistics and functional analysis. Statistical learning theory deals with the problem of finding a predictive function based on data. Statistical learning theory has led to successful applications in fields such as computer vision, speech recognition, and bioinformatics.

Statistical learning theory - Wikipedia

The field of statistical learning theory has not only seen considerable advances in the last fifteen years, it has also found many applications, some of these appearing in commercial packages. It is now classified as a subfield of artificial intelligence, and as such gives an alternative, and frequently more general viewpoint on such topics as pattern recognition, regression estimation, and signal processing.

Statistical Learning Theory | Wiley. A comprehensive look at learning and generalization theory. The statistical theory of learning and generalization concerns the problem of choosing desired functions on the basis of empirical data. Highly applicable to a variety of computer science and robotics fields, this book offers lucid coverage of the theory as a whole.

Statistical Learning Theory | Wiley

The main goal of statistical learning theory is to provide a framework for studying the problem of inference, that is of gaining knowledge, making predictions, making decisions or constructing models from a set of data.

Introduction to Statistical Learning Theory

In the second part, key ideas in statistical learning theory will be developed to analyze the properties of the algorithms previously introduced. Classical concepts like generalization, uniform convergence and Rademacher complexities will be developed, together with topics such as surrogate loss functions for classification, bounds based on margin, stability, and privacy.

CS229T/STAT231: Statistical Learning Theory (Winter 2016)

Statistical learning is the ability for humans and other animals to extract statistical regularities from the world around them to learn about the environment. Although statistical learning is now thought to be a generalized learning mechanism, the phenomenon was first identified in human infant language acquisition. The earliest evidence for these statistical learning abilities comes from a study by Jenny Saffran, Richard Aslin, and Elissa Newport, in which 8-month-old infants were presented with

Statistical learning in language acquisition - Wikipedia

The class covers foundations and recent advances of Machine Learning from the point of view of Statistical Learning Theory. Understanding intelligence and how to replicate it in machines is arguably one of the greatest problems in science. Learning, its principles and computational implementations, is at the very core of intelligence.

The main goal of this course is to study the generalization ability of a number of popular machine learning algorithms such as boosting, support vector machines and neural networks. Topics include Vapnik-Chervonenkis theory, concentration inequalities in product spaces, and other elements of empirical process theory.

Topics in Statistics: Statistical Learning Theory ...

Statistical learning theory was introduced in the late 1960's. Until the 1990's it was a purely theoretical analysis of the problem of function estimation from a given collection of data. In the middle of the 1990's new types of learning algorithms (called support vector machines) based on the developed theory were proposed.

An overview of statistical learning theory

The central contribution of statistical learning theory is the use of the psychological concepts of association and reinforcement to develop a genuinely quantitative theory of behavior. When I say genuinely

quantitative, I have in mind something rather specific. Earlier attempts at quantitative theory, perhaps especially Hull's.

Estes' Statistical Learning Theory: Past, Present, and Future

Statistical learning theory is the broad framework for studying the concept of inference in both supervised and unsupervised machine learning. Inference covers the entire spectrum of machine learning, from gaining knowledge, making predictions or decisions and constructing models from a set of labeled or unlabeled data.
