Advances in genetic analysis have revealed the first glimmerings of an older origin for *H. sapiens*, with the discovery that we and our sister species, the Neanderthals, shared a last common ancestor about half a million years ago. Such developments have led some to question the classification of a diverse array of early fossils from across Africa.

The origin of our species is largely a description of what we know about human origins. It is not an autobiography, but Stringer's personal involvement in the saga comes through very well just the same. The debates are there too, and these days it is easy to forget that those areas where there is now consensus were once rather more fiercely fought over. In the 1970s and 1980s, there were far ...
