The Critical Period Hypothesis was first proposed by Montreal neurologist Wilder Penfield and co-author Lamar Roberts in their 1959 book Speech and Brain Mechanisms, and was popularized by Eric Lenneberg in 1967 with Biological Foundations of Language. The Critical Period Hypothesis is the subject of a long-standing debate in linguistics and language acquisition over the extent to which the ability to acquire language is biologically linked to age.

The Critical Period Hypothesis - EnglishPost.org

The paper, "Language Exposure Relates to Structural Neural Connectivity in Childhood ," investigates how conversational turns – back and forth interactions between children and their adult caregivers – relate to white matter connectivity between Broca's area and Wernicke's area, two regions of the brain critical for language.

First paper published linking conversational turns with ...

The hypothesis that language is acquired during a critical period was first proposed by neurologists Wilder Penfield and Lamar Roberts in 1959 and popularized by linguist Eric Lenneberg in 1967. Lenneberg argued for the hypothesis based on evidence that children who experience brain injury early in life develop far better language skills than adults with similar injuries.

Critical period - Wikipedia

They confirmed what scientists already knew: the left hemisphere of the brain was the center of the language learning process. However, before processing grammar and vocabulary, the learners must first identify the phonological elements of the language. During this sound processing, the right side of the brain plays a critical role.

Scientists Say that Learning Languages Improves Brain ...

New evidence is presented that modifies Lenneberg's (1967) proposed critical period of language acquisition. The development of lateralization is complete much earlier than puberty and is thus not a barrier to accent free second language learning by adults. Rather, the development of lateralization may correspond to normal first language acquisition.

LATERALIZATION, LANGUAGE LEARNING, AND THE CRITICAL PERIOD ...

This means that the speech and language centers become localized in the left hemisphere of the brain. Therefore, the theory states that the neural substrate, the set of brain structures that...
