Bone Marrow Transplantation An Issue

Many of the problems that can happen shortly after the transplant come from having the bone marrow wiped out by medicines or radiation just before the transplant. Others may be side effects of the conditioning treatments themselves.

Stem Cell or Bone Marrow Transplant Side Effects

Stem cell or bone marrow transplants are complex treatments that carry a significant risk of serious complications. It's important that you're aware of both the risks and possible benefits before treatment begins. You may wish to discuss them with your treatment team and your family. Generally speaking, younger people who don't have any other serious conditions or those who receive transplants from a closely matched sibling are less likely to experience serious problems.
