Database Design Strategies. There are two approaches for developing any database, the top-down method and the bottom-up method. While these approaches appear radically different, they share the common goal of utilising a system by describing all of the interaction between the processes. Top - down design method

Database Design Strategies | Database Management | Fandom

Database design is the most important task performed by application developers because the resulting database and all applications that access it are based on this design. Therefore, if the data for the application is modeled incorrectly and the resulting database poorly designed, poor and difficult to use applications will result.
