This chapter considers whether eating disordered behaviour is autonomous. This would have important ethical implications, as there is a prima facie ethical obligation to respect autonomous behaviour. It shows that eating disordered behaviour seems undermined by some defects in autonomy, such as defects in perception of hunger and satiety, defects in the ability to apply knowledge about food to ...

Autonomy and Control in Eating Disorders - Oxford Scholarship

The State and the Body argues that the state should be particularly wary about encroaching upon exercises of autonomy by embodied selves and concludes that only interventions based upon Mill's harm principle or, in tightly confined circumstances, the dignity of the human species as a whole should suffice to justify public intervention into private choices about the body.
