I think they are still available through Kawasaki, at least that's where I bought the 79 750 twin manual a couple of years ago (hmmm, come to think of it, that was 4-5 years ago). They also show up on eBay from time to time. 80-85 KZ750 would be a four cylinder model, and they don't mix fours and twins in the same manuals.

Unlike Kawasaki’s last big twin, the BSA-clone W650, the KZ750 was thoroughly up-to-date. The 55 horsepower, 745cc twin had double overhead cams, shim and bucket valve adjustment, a Morse Hy-Vo primary drive chain and five forward gears. Vertical twins vibrate, so Kawasaki gave the 750 a pair of chain-driven counter balancers. It worked — mostly. Although smooth at low and moderate rpms ...

When the Kawasaki 750 twin made its debut a couple of years back, it was greeted with a sort of cautious fascination. Motorcyclists scrutinized the thing in much the same manner as a cat seeing his first mackerel; he is irresistibly drawn to it by something deep inside him, yet his unfamiliarity with this new phenomenon makes him approach it gingerly indeed. Market response to the KZ750 has ...

Honda and Kawasaki battled with the CB750 and Z1, furthering what a 4-cylinder 4-stroke production bike was capable of, but in '76 Kawasaki took a different approach and released the KZ750, a big bore twin like Triumph Bonneville or the Yamaha XS650. Kawasaki’s strategy was pretty interesting. While we waited for them to release like the KZ650 and the KZ900, Kawasaki played a card of ...

The Z750B was another Kawasaki that missed the mark. Having said that I personally think the Z750 was an excellent bike but the legend of the H2 triple was a hard act to follow. The Z750 was a very good handling bike with loads of low down power but the front and rear disk brakes were poor

especially in the wet. The vibration, in spite of the two chain driven engine balancer weights, was excessive

This 1976 Kawasaki KZ750 B1 comes from the model's first year in production and is powered by a 745cc parallel twin paired with a 5-speed manual transmission. The bike is said to have remained with its original owner through the mid-1990s, and with the second owner until its acquisition by the selling dealer earlier this year.
