Recycling in America has plenty of room for improvement, with only 63 percent of produced paper being recovered in 2013 [6], and 67 percent of paper in 2015 [7]. Assuming the rest of the world has similar paper recovery rates, approximately 150 million metric tons of paper and cardboard is deposited in landfills or incinerated each year.

How Is Paper Recycled: Step by Step | Greentumble

The paper is taken to a recycling plant where it is separated into types

and grades. The separated paper is then washed with soapy water to remove inks, plastic film, staples and glue. The paper is put into a large holder where it is mixed with water to create 'slurry'.

How paper is recycled « Recycling Guide

Next, if your local recycling company has implemented a Single Stream Recycling System, by which all materials are collected together, these materials must undergo a sorting process to separate different materials, such as glass, paper, or metals. Most often, the majority of this sorting process is done automatically by machines, but it may also include one
