Civics Today *McGraw-Hill/Glencoe*

A civics program building the next generation of active Americans Civics Today: Citizenship, Economics, and You meets the content standards for civics and government as outlined by the National Standards for Civics and Government. Many young citizens are completing their education with little or no sense of civic responsibility. This program teaches the knowledge and skills needed to be an effective, active citizen. It also encourages an appreciation for the American political system and fosters a willingness to take part in American democracy. Two economics units provide an understanding of the interrelationship between democracy and the free enterprise system.

The Psychology of Citizenship and Civic Engagement

Oxford University Press, USA

"In *The Psychology of Citizenship and Civic Engagement*, S. Mark Pancer explores the development of civic engagement, the factors that influence its development, and the impacts of civic involvement on the individual, the community, and society"--

Making Politics Work for Development *World Bank Publications*

Governments fail to provide the public goods needed for development when its leaders knowingly and deliberately ignore sound technical advice or are unable to follow it, despite the best of intentions, because of political constraints. This report focuses on two forces—citizen engagement and transparency—that hold the key to solving government failures by shaping how political markets function. Citizens are not only queueing at voting booths, but are also taking to the streets and using diverse media to pressure, sanction and select the leaders who wield power within government, including by entering as contenders for leadership. This political engagement can function in highly nuanced ways within the same formal institutional context and across the political spectrum, from autocracies to democracies. Unhealthy political engagement, when leaders are selected and sanctioned on the basis of their provision of private benefits rather than public goods, gives rise to government failures. The solutions to these failures lie in fostering healthy political engagement within any institutional context, and not in circumventing or suppressing it. Transparency, which is citizen access to publicly available information about the actions of those in government, and the consequences of these actions, can play a crucial role by nourishing political engagement.

American Public Education and the Responsibility of Its Citizens *Oxford University Press*

"Rather than poorly performing schools, the current educational crisis is really about citizen responsibility. Citizens must insure that democratic practices are nurtured. This is perhaps most achievable in public schools. Therefore, citizens have a responsibility to support public schools and this book offers tools and knowledge to help citizens fulfill it"--

Civic Ideals *Yale University Press*

Is civic identity in the United States really defined by liberal, democratic political principles? Or is U.S. citizenship the product of multiple traditions--not only liberalism and republicanism but also white supremacy, Anglo-Saxon supremacy, Protestant supremacy, and male supremacy? In this powerful and disturbing book, Rogers Smith traces political struggles over U.S. citizenship laws from the colonial period through the Progressive era and shows that throughout this time, most adults were legally denied access to full citizenship, including political rights, solely because of their race, ethnicity, or gender. Basic conflicts over these denials have driven political development and civic membership in the U.S., Smith argues. These conflicts are what truly define U.S. civic identity up to this day. Others have claimed that nativist, racist, and sexist traditions have been marginal or that they are purely products of capitalist institutions. In contrast, Smith's pathbreaking account explains why these traditions have been central to American political and economic life. He shows that in the politics of nation building, principles of democracy and liberty have often failed to foster a sense of shared "peoplehood" and have instead led many Americans to claim that they are a "chosen people," a "master race" or superior culture, with distinctive gender roles. Smith concludes that today the United States is in a period of reaction against the egalitarian civic reforms of the last generation, with nativist, racist, and sexist

beliefs regaining influence. He suggests ways that proponents of liberal democracy should alter their view of U.S. citizenship in order to combat these developments more effectively.

Democracy and Education

John Dewey's *Democracy and Education* addresses the challenge of providing quality public education in a democratic society. In this classic work Dewey calls for the complete renewal of public education, arguing for the fusion of vocational and contemplative studies in education and for the necessity of universal education for the advancement of self and society. First published in 1916, *Democracy and Education* is regarded as the seminal work on public education by one of the most important scholars of the century.

Pocketbook Politics *Princeton University Press*

"How much does it cost?" We think of this question as one that preoccupies the nation's shoppers, not its statesmen. But, as *Pocketbook Politics* dramatically shows, the twentieth-century American polity in fact developed in response to that very consumer concern. In this groundbreaking study, Meg Jacobs demonstrates how pocketbook politics provided the engine for American political conflict throughout the twentieth century. From Woodrow Wilson to Franklin Roosevelt to Richard Nixon, national politics turned on public anger over the high cost of living. Beginning with the explosion of prices at the turn of the century, every strike, demonstration, and boycott was, in effect, a protest against rising prices and inadequate income. On one side, a reform coalition of ordinary Americans, mass retailers, and national politicians fought for laws and policies that promoted militant unionism, government price controls, and a Keynesian program of full employment. On the other, small businessmen fiercely resisted this low-price, high-wage agenda that threatened to bankrupt them. This book recaptures this dramatic struggle, beginning with the immigrant Jewish, Irish, and Italian women who flocked to Edward Filene's famous Boston bargain basement that opened in 1909 and ending with the Great Inflation of the 1970s. *Pocketbook Politics* offers a new interpretation of state power by integrating popular politics and elite policymaking. Unlike most social historians who focus exclusively on consumers at the grass-roots, Jacobs breaks new methodological ground by insisting on the centrality of national politics and the state in the nearly century-long fight to fulfill the American Dream of abundance.

Insurgent Citizenship *Princeton University Press*

Insurgent citizenships have arisen in cities around the world. This book examines the insurgence of democratic citizenship in the urban peripheries of São Paulo, Brazil, its entanglement with entrenched systems of inequality, and its contradiction in violence. James Holston argues that for two centuries Brazilians have practiced a type of citizenship all too common among nation-states--one that is universally inclusive in national membership and massively inegalitarian in distributing rights and in its legalization of social differences. But since the 1970s, he shows, residents of Brazil's urban peripheries have formulated a new citizenship that is destabilizing the old. Their mobilizations have developed not primarily through struggles of labor but through those of the city--particularly illegal residence, house building, and land conflict. Yet precisely as Brazilians democratized urban space and achieved political democracy, violence, injustice, and impunity increased dramatically. Based on comparative, ethnographic, and historical research, *Insurgent Citizenship* reveals why the insurgent and the entrenched remain dangerously conjoined as new kinds of citizens expand democracy even as new forms of violence and exclusion erode it. Rather than view this paradox as evidence of democratic failure and urban chaos, *Insurgent Citizenship* argues that contradictory realizations of citizenship characterize all democracies--emerging and established. Focusing on processes of city- and citizen-making now prevalent globally, it develops new approaches for understanding the contemporary course of democratic citizenship in societies of vastly different cultures and histories.

Understanding Political Ideas and Movements *Manchester University Press*

Underpinned by the work of major thinkers such as Marx, Locke, Weber, Hobbes and Foucault, the first half of the book looks at political concepts including: the state and sovereignty; the nation; democracy; representation and legitimacy; freedom; equality and rights; obligation; and citizenship. There is also a specific chapter which addresses the role of ideology in the shaping of politics and society. The second half of the book addresses traditional theoretical subjects such as socialism, Marxism and nationalism, before moving on to more contemporary movements such as environmentalism, ecologism and feminism.

Globalization at Risk *Yale University Press*

History has declared globalization the winner of the 20th century.

Globalization connected the world and created wealth unimaginable in the wake of the Second World War. But the financial crisis of 2008-09 has now placed at risk the liberal economic policies behind globalization. Engulfing the entire world, the crisis gave new fuel to the skeptics of the benefits of economic integration. Policy responses seem to favor anti-globalizers. New regulations could balkanize the global financial system, while widespread protectionist impulses might undo the Doha Round. Issues from climate change to national security may be used as convenient excuses to keep imports out, keep jobs at home, and to clamp down on global capital. Will globalization triumph or perish in the 21st century? What reforms make sense in the post-crisis world? International economists Gary Clyde Hufbauer and Kati Suominen argue that globalization has been a force of great good, one that needs to be actively advanced and honed. Drawing on the latest economic analyses, they reveal the drivers and effects of global finance and trade, lay out the key risks to globalization, and offer a practical policy roadmap for managing the challenges while increasing the gains. Vital reading for anyone in business, finance, foreign affairs, or economics, *Globalization at Risk* is sure to advance public debate on this defining issue of the 21st century.

On Political Equality *Yale University Press*

In this book, the eminent psychoanalyst Leonard Shengold looks at why some people are resistant to change, even when it seems to promise a change for the better. Drawing on a lifetime of clinical experience as well as wide readings of world literature, Shengold shows how early childhood relationships with parents can lead to a powerful conviction that change means loss. Dr. Shengold, who is well known for his work on the lasting affects of childhood trauma and child abuse in such seminal books as *Soul Murder* and *Soul Murder Revisited*, continues his exploration into the consequences of early psychological injury and loss. In the examples of his patients and in the lives and work of such figures as Edna St. Vincent Millay, William Wordsworth, and Henrik Ibsen, Shengold looks at the different ways in which unconscious impressions connected with early experiences and fantasies about parents are integrated into individual lives. He shows the difficulties he encounters with his patients in raising these memories to the conscious level where they can be known and owned; and he also shows, in his survey of literary figures, how these memories can become part of the creative process. *Haunted by Parents* offers a deeply humane reflection on the values and limitations of therapy, on memory and the lingering effects of the past, and on the possibility of recognizing the promise of the future.

Muslims and Citizens *Yale University Press*

A groundbreaking study of the role of Muslims in eighteenth-century France "This elegant, braided history of Muslims and French citizenship is urgently needed. It will be a 'must read' for students of the French Revolution and anyone interested in modern France."—Carla Hesse, University of California, Berkeley From the beginning, French revolutionaries imagined their transformation as a universal one that must include Muslims, Europe's most immediate neighbors. They believed in a world in which Muslims could and would be French citizens, but they disagreed violently about how to implement their visions of universalism and accommodate religious and social difference. Muslims, too, saw an opportunity, particularly as European powers turned against the new French Republic, leaving the Muslim polities of the Middle East and North Africa as France's only friends in the region. In *Muslims and Citizens*, Collier examines how Muslims came to participate in the political

struggles of the revolution and how revolutionaries used Muslims in France and beyond as a test case for their ideals. In his final chapter, Collier reveals how the French Revolution's fascination with the Muslim world paved the way to Napoleon's disastrous invasion of Egypt in 1798.

Last Project Standing *U of Minnesota Press*

In 1995 a half-vacant public housing project on Chicago's Near West Side fell to the wrecking ball. The demolition and reconstruction of the Henry Horner housing complex ushered in the most ambitious urban housing experiment of its kind: smaller, mixed-income, and partially privatized developments that, the thinking went, would mitigate the insecurity, isolation, and underemployment that plagued Chicago's infamously troubled public housing projects. Focusing on Horner's redevelopment, Catherine Fennell asks how Chicago's endeavor transformed everyday built environments into laboratories for teaching urbanites about the rights and obligations of belonging to a city and a nation that seemed incapable of taking care of its most destitute citizens. Drawing on more than three years of ethnographic and archival research, she shows how collisions with everything from haywire heating systems and decaying buildings to silent neighbors became an education in the possibilities, but also the limits, of collective care, concern, and protection in the aftermath of welfare failure. As she documents how the materiality of both the unsuccessful older projects and the recently emerging housing fosters feelings of belonging and loss, her work engages larger debates in critical anthropology and poverty studies—and opens a vital new perspective on the politics of space, race, and development in urban America

World Social Report 2020 *United Nations*

This report examines the links between inequality and other major global trends (or megatrends), with a focus on technological change, climate change, urbanization and international migration. The analysis pays particular attention to poverty and labour market trends, as they mediate the distributional impacts of the major trends selected. It also provides policy recommendations to manage these megatrends in an equitable manner and considers the policy implications, so as to reduce inequalities and support their implementation.

The Gardens of Democracy *Sasquatch Books*

American democracy is informed by the 18th century's most cutting edge thinking on society, economics, and government. We've learned some things in the intervening 230 years about self interest, social behaviors, and how the world works. Now, authors Eric Liu and Nick Hanauer argue that some fundamental assumptions about citizenship, society, economics, and government need updating. For many years the dominant metaphor for understanding markets and government has been the machine. Liu and Hanauer view democracy not as a machine, but as a garden. A successful garden functions according to the inexorable tendencies of nature, but it also requires goals, regular tending, and an understanding of connected ecosystems. The latest ideas from science, social science, and economics—the cutting-edge ideas of today--generate these simple but revolutionary ideas: True self interest is mutual interest. (Society, it turns out, is an ecosystem that is healthiest when we take care of the whole.) Society becomes how we behave. (The model of citizenship depends on contagious behavior, hence positive behavior begets positive behavior.) We're all better off when we're all better off. (The economy is not an efficient machine. It's an effective garden that need tending. Adjust the definition of wealth to society creating solutions for all.) Government should

be about the big what and the little how. (Government should establish the ideas and the goals, and then let the people find the solutions of how to make it happen.) Freedom is responsibility. (True freedom is not about living some variant of libertarianism but rather an active cooperation a part of a big whole society; freedom costs a little freedom.) The Gardens of Democracy is an optimistic, provocative, and timely summons to improve our role as citizens in a democratic society.

Teaching Civic Engagement

Teaching Civic Engagement provides an exploration of key theoretical discussions, innovative ideas, and best practices in educating citizens in the 21st century. The book addresses theoretical debates over the place of civic engagement education in Political Science. It offers pedagogical examples in several sub-fields, including evidence of their effectiveness and models of appropriate assessment. Written by political scientists from a range of institutions and subfields, Teaching Civic Engagement makes the case that civic and political engagement should be a central part of our mission as a discipline.

Influences of the IEA Civic and Citizenship Education Studies *Springer Nature*

This open access book identifies the multiple ways that IEA's studies of civic and citizenship education have contributed to national and international educational discourse, research, policymaking, and practice. The IEA International Civic and Citizenship Education Study (ICCS), first conducted in 2009, was followed by a second cycle in 2016. The project was linked to the earlier IEA Civic Education Study (CIVED 1999, 2000). IEA's ICCS remains the only large-scale international study dedicated to formal and informal civic and citizenship education in school. It continues to make substantial contributions to understanding the nature of the acquired civic knowledge, attitudes, and participatory skills. It also discusses in-depth how a wide range of countries prepare their young people for citizenship in changing political, social, and economic circumstances. The next cycle of ICCS is planned for 2022. In this book, more than 20 national representatives and international scholars from Europe, Latin America, Asia, and North America assess how the processes and findings of the 2009 and 2016 cycles of ICCS and CIVED 1999/2000 have been used to improve nations' understanding of their students' civic knowledge, beliefs, attitudes, current civic-related behaviors, and intentions for future participation in a comparative context. There are also chapters summarizing the secondary analysis of those studies' results indicating their usefulness for educational improvement and reflecting on policy issues. The analyses and reflections in this book provide timely insight into international educational discourse, policy, practice, and research in an area of education that is becoming increasingly important for many societies.

Social Justice in an Open World *United Nations Publications*

The International Forum for Social Development was a 3 year project undertaken by the United Nations. Department of Economic and Social Affairs between 2001 and 2004 to promote international cooperation for social development and supporting developing countries and social groups not benefiting from the globalization process. This publication provides an overview and interpretation of the discussions and debates that occurred at the four meetings of the Forum for Social Development held at the United Nations headquarters in New York, within the framework of the implementation of the outcome of the World Summit for Social Development.

Schools, Curriculum and Civic Education for Building Democratic Citizens *Brill / Sense*

How can schools and the school curriculum contribute to building democratic citizens? This is a major question posed by governments, educational systems, schools, teachers and researchers around the world. One important way is to identify the competences needed for preparing democratic citizens and incorporate these within both the formal and informal school curriculum. Another question must then be posed- what competences do young citizens need to be considered as active and engaged in modern democracies? In 2011 an invited research symposium of leading civic and political educators, and social scientists from across Europe met in Hannover, Germany to consider this key concern facing Europe today. In examining the above questions the symposium addressed two significant issues: 1. Identify key competencies required for active citizenship of young people in Europe of the future. 2. Translate those competencies to school-based activities in the form of curricular and pedagogical strategies. The publication *Civic Education and Competences for Engaging Citizens in Democracies* addressed the first issue and this volume addresses the second issue. Through discussion in the invited symposium, previously prepared papers, and participation in a modified Delphi Technique the participants have prepared chapters for this book. The chapters of this book represent the contribution of the participants before, during and after the symposium with opportunities for review and reflection about competences for democratic citizenship and the role of schools and the curriculum. Murray Print and Dirk Lange are professors from the University of Sydney and Leibniz University of Hannover respectively and are national leaders in civics and

citizenship education in their respective countries. They have brought together a group of leading European civic and citizenship educators from different academic fields to explore the key issue and to identify the competences for young people to become active and engaged European citizens.

Better Capitalism *Yale University Press*

Shows that, with wise and informed policymaking, the American entrepreneurial engine can rally and the true potential of the economy can be unlocked.

A Crucible Moment

This report from the National Task Force on Civic Learning and Democratic Engagement calls on the nation to reclaim higher education's civic mission. Commissioned by the Department of Education and released at a White House convening in January 2012, the report pushes back against a prevailing national dialogue that limits the mission of higher education to workforce preparation and training while marginalizing disciplines basic to democracy. It calls on educators and public leaders to advance a 21st century vision of college learning for all students, a vision with civic learning and democratic engagement an expected part of every student's college education. The report documents the nation's anemic civic health and includes recommendations for action that address campus culture, general education, and civic inquiry as part of major and career fields as well as hands on civic problem solving across differences. This report was prepared at the invitation of the U.S. Department of Education under the leadership of the Global Perspective Institute, Inc. (GPI) and AAC&U. It was developed with input from a series of national roundtables involving leaders from all parts of the higher education and civic renewal communities.

Encyclopedia of Quality of Life and Well-Being Research *Springer*

The aim of this encyclopedia is to provide a comprehensive reference work on scientific and other scholarly research on the quality of life, including health-related quality of life research or also called patient-reported outcomes research. Since the 1960s two overlapping but fairly distinct research communities and traditions have developed concerning ideas about the quality of life, individually and collectively, one with a fairly narrow focus on health-related issues and one with a quite broad focus. In many ways, the central issues of these fields have roots extending to the observations and speculations of ancient philosophers, creating a continuous exploration by diverse explorers in diverse historic and cultural circumstances over several centuries of the qualities of human existence. What we have not had so far is a single, multidimensional reference work connecting the most salient and important contributions to the relevant fields. Entries are organized alphabetically and cover basic concepts, relatively well established facts, lawlike and causal relations, theories, methods, standardized tests, biographic entries on significant figures, organizational profiles, indicators and indexes of qualities of individuals and of communities of diverse sizes, including rural areas, towns, cities, counties, provinces, states, regions, countries and groups of countries.
