Volvo Penta Dp S 1

Product Information. The Volvo Penta Sterndrive DP-SM 1:1.95-ratio outdrive combines outboard drive with inboard power. With the engine above the waterline, the drive unit carries power from the engine to the propeller that's located beneath the waterline. The result is higher horsepower for your boat. Because ingress and egress are less cumbersome with this configuration, this model is popular with fishermen, operators of passenger pleasure boats, and marine rescue teams.

Re: Volvo Penta Dp-s gear ratio change Thanks, I was not sure about the RPM increase that I would of had changing it from a 1.95:1 to 2.32:1 ratio. I know that it would have affected my top speed running at a higher RPM. It is a rare occurrence for me to run at WOT, as I only tend to cruise about 19-25 knots. The 5.7 GS's speed range is 4200-4600.
