$P(A \text{ or } B) = P(A) + P(B)$ Example: If event A is that a person is blood group O and event B is that they are blood group B, then these events are mutually exclusive since a person may only be either one or the other. Hence, the probability that a given person is either group O or B is $P(A)+P(B)$. Multiplication Rule.

Elementary Probability Theory with Stochastic Processes ...
I taught probability to undergraduate math majors recently and I used Chung's "Elementary Probability Theory." (You can check out the webpage for my course if you like.) I really like this book as a very gentle introduction to probability. Chung has a nice way of explaining the fundamental concepts in an intuitive yet rigorous manner.
