Practice Problems - Osmosis and Water potential

Reminders: Units of water potential, pressure potential and solute potential are typically bars, megapascals or kilopascals. When solving the problems below, use the same units as the prompt. If there are no units in the prompt, your units for water potential will be bars because the R constant in your Appendix B is 0.0831 liters bars/moles K. (For problems in megapascals, R is 0.00831 liters megapascals /moles K.

R in this case is 10 times smaller because 1 MPa = 10 bars.)
