The Technical Analysis of Price Action for the Serious Trader *John Wiley & Sons*

While complex strategies and systems may work for some traders, understanding price action is all you really need to succeed in this arena. Price action analysis is an effective approach to trading today's markets—whether you're involved in stocks, futures, or options. It allows you to focus on the process

of trading without being overwhelmed by a complicated collection of trading techniques. And while this method may appear elementary, it can significantly enhance returns as well as minimize downside risk. One way to apply price action analysis to your trading endeavors is with chart patterns. Nobody understands this better than author Al Brooks, a technical analyst for Futures magazine and an independent trader for more than twenty years. Brooks discovered ten years ago that reading price charts without indicators proved to be the most simple, reliable, and profitable way for him to trade. Mastering that discipline is what made him consistently successful in trading. Now, with Reading Price Charts Bar by Bar, Brooks shares his extensive experience on how to read price action. At the end of the day, anyone can look at a chart, whether it is a candle chart for E-mini S&P 500 futures trading or a bar chart for stock trading, and see very clear entry and exit points. But doing this in real time is much more difficult. Reading Price Charts Bar by Bar will help you become proficient in the practice of reading price action—through the use of trendlines and trend channel lines, prior highs and lows, breakouts and failed breakouts, and other tools—and show you how this approach can improve the overall risk-reward

ratio of your trades. Written with the serious trader in mind, this reliable resource addresses the essential elements of this discipline, including the importance of understanding every bar on a price chart, why particular patterns are reliable setups for trades, and how to locate entry and exit points as markets are trading in real time. Brooks focuses on five-minute candle charts to illustrate basic principles, but discusses daily and weekly charts as well. Along the way, he also explores intraday swing trades on several stocks and details option purchases based on daily charts—revealing how using price action alone can be the basis for this type of trading.

There's no easy way to trade, but if you learn to read price charts, find reliable patterns, and get a feel for the market and time frame that suits your situation, you can make money. While price action trading doesn't require sophisticated software or an abundance of indicators, this straightforward approach can still put you in a better position to profit in almost any market. Reading Price Charts Bar by Bar will show you how.

Reading Price Charts Bar by Bar

The Technical Analysis of Price Action for the Serious Trader

While new technology and complicated theories promise to

take your trading to "the next level," the truth is that long-term success in this field is rooted in simplicity. That's why Al Brooks has created Reading Price Charts Bar by Bar. With this book, Brooks'a technical analyst for Futures magazine and an independent trader'demonstrates how applying price action analysis to chart patterns can help enhance returns and minimize downside risk. Along the way, you'll discover the importance of understanding every bar on a price chart, why particular patterns are reliable setups for trades, and how to locate entry and exit points as markets are trading in real time. Throughout these pages, some of the most useful tools for deciphering price action are covered in detail, including: - Trendlines and trend channel lines - Prior highs and lows - Breakouts and failed breakouts - The size of bodies and tails on candles - The relationship between current bars to prior bars - And much more

Learning what the market is telling you can be difficult, but with the right approach, you can achieve this goal and capture consistent profits in the process. Reading Price Charts Bar by Bar has all the information you need to succeed at this endeavor and will put you in the best position possible to make the most of your time in today's turbulent markets. Praise for

Reading Price Charts Bar by Bar "Al Brooks has written a book every day trader should read. On all levels, he has kept trading simple, straightforward, and approachable. By teaching traders that there are no rules, just guidelines, he has allowed basic common sense to once again rule how real traders should approach the market. This is a must-read for any trader that wants to learn his own path to success." 'Noble DraKoln, founder of www.SpeculatorAcademy.com and author of Trade Like a Pro and Winning the Trading Game "Al Brooks is a trader's trader. He understands the focused energy it takes to be successful at trading and works long,

hard hours in front of the computer screen to beat the markets. In his first trading book, he outlines, selflessly, his strategy step by step. A doctor and educator in his previous life, he uses his eye for detail and transfers lessons he learned in training himself on the art of trading to the written page. For those who are willing to delve into the details of day trading and dedicate the time and energy to do it seriously and most likely profitably, Al Brooks's book Reading Price Charts Bar by Bar, is a must-read." 'Ginger Szala, Publisher and Editorial Director, Futures magazine.

Trading Price Action Trends

**Technical Analysis of
Price Charts Bar by
Bar for the Serious
Trader** *John Wiley &
Sons*

A practical guide to profiting from institutional trading trends. The key to being a successful trader is finding a system that works and sticking with it. Author Al Brooks has done just that. By simplifying his trading system and trading only 5-minute price charts he's found a way to capture profits regardless of market direction or economic climate. His first book, *Reading Price Charts Bar by Bar*, offered an informative examination of his system, but it didn't allow him to get into the real nuts and bolts of the approach. Now, with this new series of

books, Brooks takes you step by step through the entire process. By breaking down his trading system into its simplest pieces: institutional piggybacking or trend trading (the topic of this particular book in the series), trading ranges, and transitions or reversals, this three book series offers access to Brooks' successful methodology. *Price Action Trends Bar by Bar* describes in detail what individual bars and combinations of bars can tell a trader about what institutions are doing. This is critical because the key to making money in trading is to piggyback institutions and you cannot do that unless you understand what the charts are

telling you about their behavior. This book will allow you to see what type of trend is unfolding, so can use techniques that are specific to that type of trend to place the right trades. Discusses how to profit from institutional trading trends using technical analysis. Outlines a detailed and original trading approach developed over the author's successful career as an independent trader. Other books in the series include *Price Action Trading Ranges Bar by Bar* and *Price Action Reversals Bar by Bar*. If you're looking to make the most of your time in today's markets, the trading insights found in *Price Action Trends Bar by Bar* will help you achieve this goal.

Trading Price Action Trading Ranges

Technical Analysis of Price Charts Bar by Bar for the Serious Trader *John Wiley & Sons*

Praise for *Trading Price Action Trading Ranges*: "Al Brooks has written a book every day trader should read. On all levels, he has kept trading simple, straightforward, and approachable. By teaching traders that there are no rules, just guidelines, he has allowed basic common sense to once again rule how real traders should approach the market. This is a must-read for any trader that wants to learn his own path to success." —Noble Drakoln, founder, SpeculatorAcademy.com, and author of *Trade*

Like a Pro and Winning the Trading Game "A great trader once told me that success was a function of focused energy. This mantra is proven by Al Brooks, who left an ophthalmology practice to become a day trader. Al's intense focus on daily price action has made him a successful trader. A born educator, Al also is generous with his time, providing detailed explanations on how he views daily price action and how other traders can implement his ideas with similar focus and dedication. Al's book is no quick read, but an in-depth roadmap on how he trades today's volatile markets, complete with detailed strategies, real-life examples, and hard-knock advice." —Ginger Szala, Publisher and Editorial Director, Futures magazine

Over the course of his career, author Al Brooks, a technical analysis contributor to Futures magazine and an independent trader for twenty-five years, has found a way to capture consistent profits regardless of market direction or economic climate. And now, with his new three-book series—which focuses on how to use price action to trade the markets—Brooks takes you step by step through the entire process. In order to put his methodology in perspective, Brooks examined an essential array of price action basics and trends in the first book of this series, *Trading Price Action TRENDS*. Now,

in this second book, *Trading Price Action*, he provides important insights on trading ranges, breakouts, order management, and the mathematics of trading. Page by page, Brooks skillfully addresses how to spot and profit from trading ranges—which most markets are in, most of the time—using the technical analysis of price action. Along the way, he touches on some of the most important aspects of this approach, including trading breakouts, understanding support and resistance, and making the most informed entry and exit decisions possible. Throughout the book, Brooks focuses primarily on 5 minute candle charts—all of which are

created with TradeStation—to illustrate basic principles, but also discusses daily and weekly charts. And since he trades more than just E-mini S&P 500 futures, Brooks also details how price action can be used as the basis for trading stocks, forex, Treasury Note futures, and options.

Trading Price Action Reversals

Technical Analysis of Price Charts Bar by Bar for the Serious Trader *John Wiley & Sons*

A detailed guide to profiting from trend reversals using the technical analysis of price action. The key to being a successful trader is finding a system that works and

sticking with it. Author Al Brooks has done just that. By simplifying his trading system and trading only 5-minute price charts he's found a way to capture profits regardless of market direction or economic climate. His first book, *Reading Price Charts Bar by Bar*, offered an informative examination of his system, but it didn't allow him to get into the real nuts and bolts of the approach. Now, with this new series of books, Brooks takes you step by step through the entire process. By breaking down his trading system into its simplest pieces: institutional piggybacking or trend trading, trading ranges, and transitions or reversals (the focus of this book), this three

book series offers access to Brooks' successful methodology. *Trading Price Action Reversals* reveals the various types of reversals found in today's markets and then takes the time to discuss the specific characteristics of these reversals, so that you can use them in your everyday trading endeavors. While price action analysis works on all time frames, there are different techniques that you can use in trading intraday, daily, weekly and monthly charts. This, among many other issues, is also addressed throughout these pages. Offers insights on how to handle volatility and sharp reversals. Covers the concept of using options when trading

certain charts Examines how to deal with the emotions that come along with trading. Other books in the series include Trading Price Action Trends and Trading Price Action Trading Ranges. If you're looking to make the most of your time in today's markets, the trading insights found in Trading Price Action Reversals will help you achieve this goal.

Trade Like a Pro

15 High-Profit Trading Strategies

John Wiley & Sons

Praise for Trade Like a Pro "Noble's commitment to the individual trader is exactly what traders need during these volatile times. He has knowledge that spans across markets and is

worldwide. He is a valued contributor to the TraderPlanet.com community, and this book further demonstrates his dedication to educating traders and helping them become more successful." —Lane J. Mendelsohn, Publisher, TraderPlanet.com "In a time when, on a global level, important things are happening to the financial industry, when new profit opportunities as well as risks are revealed, the book Trade Like a Pro offers a complete picture concerning the risk administration techniques." —Teodor Ancuta, President and General Manager, Sibiu Stock Exchange "Trade Like a Pro is a comprehensive presentation of all the basic trading strategies that belongs in every

investor's library. Whether your specialty is futures, options, or stocks—or, for that matter, a combination of all three—you will find yourself going back to this valuable reference guide again and again. Everything rings true. Moreover, the author gives you the pros and cons of each respective strategy without imposing his own point of view. Well researched and presented." —George Angell, author of *Small Stocks for Big Profits* and *Winning in the Futures Market* "Armed with good intentions, most new traders are unaware of the realities involved. Although there is often the belief among novice traders that profitability will be easy, the evidence

strongly suggests otherwise. In his new book, *Trade Like a Pro: 15 High-Profit Trading Strategies*, Noble DraKoln offers a thoughtful approach to making the transition from unsuccessful retail trader to the arena of the professional, which is imperative for lasting success as a trader." —Ron Rossway, President, Denver Trading Group

READING PRICE CHARTS BAR by BAR Resumen

Les ofrezco el resumen en español de uno de los mejores libros escritos sobre la acción del precio. El libro fue escrito por Al Brooks, considerado una autoridad en lo que se refiere al enfoque del price action. El libro únicamente se

encuentra en inglés, y cabe destacar que está escrito de forma algo confusa, con un lenguaje técnico que puede resultar complicado de seguir en caso de no tener conocimientos previos de esta metodología. Los capítulos 12 y 14 han sido omitidos por incluir principalmente imágenes que no podemos adjuntar en el resumen por cuestiones de protección de datos. Gracias a este resumen de 34 páginas podrás disfrutar de todo el conocimiento que ofrece este gran libro. Espero que lo disfruten y le saquen todo el provecho posible. The Art and Science of Technical Analysis

Market Structure, Price Action, and Trading Strategies

John Wiley & Sons

A breakthrough trading book that provides powerful insights on profitable technical patterns and strategies. *The Art and Science of Technical Analysis* is a groundbreaking work that bridges the gaps between the academic view of markets, technical analysis, and profitable trading. The book explores why randomness prevails in markets most, but not all, of the time and how technical analysis can be used to capture statistically validated patterns in certain types of market conditions. The belief of the book is that buying and selling pressure causes patterns in prices, but that these technical

patterns are only effective in the presence of true buying/selling imbalance. The Art and Science of Technical Analysis is supported by extensive statistical analysis of the markets, which will debunk some tools and patterns such as Fibonacci analysis, and endorse other tools and trade setups. In addition, this reliable resource discusses trader psychology and trader learning curves based on the author's extensive experience as a trader and trainer of traders. Offers serious traders a way to think about market problems, understand their own performance, and help find a more productive path forward. Includes extensive research to validate specific

money-making patterns and strategies. Written by an experienced market practitioner who has trained and worked with many top traders. Filled with in-depth insights and practical advice, The Art and Science of Technical Analysis will give you a realistic sense of how markets behave, when and how technical analysis works, and what it really takes to trade successfully.

Understanding Price Action

Practical Analysis of the 5-Minute Time Frame

Understanding Price Action is a must read for both the aspiring and professional trader who seek to obtain a deeper understanding of what is commonly

referred to as "trading from the naked chart." With hundreds of examples commented on in great detail, Volman convincingly points out that only a handful of price action principles are responsible for the bulk of fluctuations in any market session-and that it takes common sense, much more than mastery, to put these essentials to one's benefit in the trading game. The power of the book lies in the exceptional transparency with which the concepts and trading techniques are put forth. Besides offering the reader a comprehensive study on price action mechanics, included within is a series of six months of consecutive sessions of the eur/usd 5-minute. Containing

nearly 400 fully annotated charts, this section alone harbors a massive database of intraday analysis, not found in any other trading guide. Written with a razor-sharp eye for practical detail, yet in a highly absorbable manner, *Understanding Price Action* breathes quality from every page and is bound to become a classic in the library of any trader who is serious about his education.

Dynamic Trading Indicators

Winning with Value Charts and Price Action Profile *John Wiley & Sons*

Using the insights that stem from value charts and price action profiles, *Dynamic Trading Indicators* shows traders how to

develop systems and whole trading programs that implement these exciting new tools. Through an in-depth exploration of how to effectively use these new technical indicators in a complete trading system, *Dynamic Trading Indicators* provides a framework that allows readers to obtain a view of what a stock will most likely do next. This innovation in chart design opens up new vistas for traders and unlocks the door to unlimited profits. New technology and the advent of around the clock trading have opened the floodgates to both foreign and domestic markets. Traders need the wisdom of industry veterans and the vision

of innovators in today's volatile financial marketplace. The *Wiley Trading* series features books by traders who have survived the market's ever changing temperament and have prospered—some by reinventing systems, others by getting back to basics. Whether a novice trader, professional or somewhere in-between, these books will provide the advice and strategies needed to prosper today and well into the future. Mark W. Helweg has worked and traded on the floor of the Chicago Board of Trade and, earlier in his career, partnered with an international CTA with over \$40 million under management to research new trading system technology. David C. Stendahl is

cofounder of RINA Systems, a software provider for systematic traders. Stendahl is the author of Profit Strategies: Unlocking Trading Performance with Money Management.

High Profit Price Action Trading for Beginners

How to combine Price Action with Supply and Demand *Createspace*

Independent Publishing Platform

The key to consistent profits is not as elusive as most brand new self-directed traders think; I ask new traders do you want to get rich quick or do you want to get rich forever? The easy part of investing and trading is making the mistakes, the hard part is what to do with all the cash you will make from being patient and letting the market come to you and give you what you want. New people who

get into the trading business have dollar signs in their eyes. They are buying Ferrari's and G650's before they ever make a live trade. The unrealistic expectations they have can cloud their judgment as to what is real and not real. All they see is the amount of money that they can potentially make when it is how much money they can lose is what they should be focusing on. They don't realize they are entering a business where the professional people have a kill everyone mentality when it comes to making money. High Profit Price Action Trading for Beginners is for beginners and will detail many of the things that a brand new trader must learn

not to do before they can become consistently profitable in the live markets. The key to success in the investing and trading business is not making the mistakes your competition is making and learning to see them making those mistakes so you can profit from them. Using price action in conjunction with supply and demand as well as end of day trading methods will empower you to make money right away in any liquid live market you wish to trade. The beauty of this method is that it works on any asset class on any time frame. You just have to learn to train your eyes to see the smart money and your competition on a trading chart at a glance and then take

action to make money from them, that part is up to you. The principles in High Profit Price Action Trading for Beginners are the easiest fastest methods for a self-directed beginner to learn right away which will put them on the fast track to driving their new money train to the bank every day. You absolutely need to have a competitive edge in the markets, and you must have it before you do anything in the live markets with real money. The methods in High Profit Price Action Trading for Beginners are the best ways to get you started developing your money making edge. Don't be the one who pays, be the one who gets paid!

Charting and Technical Analysis

Fred McAllen

To invest successfully or trade in Stocks, Options, Forex, or even Mutual Funds, it is imperative to know AND understand price and market movements that can only be learned from Technical Analysis. You should NEVER attempt Trading or Investing without it! My 25 years experience has taught me that 'Every book on the market' regarding Charting and Technical Analysis are seemingly worthless! All seem to find yet another creative way to tell you to "Buy Low and Sell High!" And they offer NO in-depth understanding or analysis about WHO is buying and WHO is selling, and when. Point is, anyone, experienced or not, can show you a picture

of a Chart and tell you to buy at the bottom and sell at the top. That is simple 'hindsight', and is always 20/20! This book is different! It is IN-DEPTH - EXPLAINED and you WILL learn price movements and technical analysis from this information! You will understand and recognize tops and bottoms in the market and in particular stocks, AS they are forming. This is highly valuable information, and you should NEVER attempt to trade or invest without this knowledge! Mutual Funds? Most people think they do not need this information because they have a Mutual Fund. That could not be farther from the truth. Investing your hard-earned money should

be done with your own knowledge of market direction, when to buy, and when to move your money to safety. Without this knowledge you are at the mercy of a salesperson hungry to earn a commission. Thus, invariably entering the market at the wrong time and in the wrong investment. No one else has your best interest in mind, either learn to protect your money or keep it in the bank. It's that simple. The next move is yours.

Bollinger on Bollinger Bands
McGraw Hill Professional

John Bollinger is a giant in today's trading community. His Bollinger Bands sharpen the sensitivity of fixed indicators, allowing them to more precisely reflect a market's volatility. By more accurately indicating the existing market environment,

they are seen by many as today's standard—and most reliable—tool for plotting expected price action. Now, in Bollinger on Bollinger Bands, Bollinger himself explains how to use this extraordinary technique to compare price and indicator action and make sound, sensible, and profitable trading decisions. Concise, straightforward, and filled with instructive charts and graphs, this remarkable book will be essential reading for all serious traders, regardless of market. Bollinger includes his simple system for implementation, and techniques for combining bands and indicators.

Point and Figure Charting

The Essential Application for Forecasting and Tracking Market Prices *John Wiley & Sons*

"Everyone who's involved in financial markets must understand Point and Figure charting in order to get the full picture, whatever your view of technical analysis". - Jim Rogers, author of *Hot Commodities and Investment Biker* "An invaluable road map for managing risk in the markets. Tom's methodology has given us the discipline and confidence to look around corners for our clients for almost twenty years." - James A. Parish, President and COO, Morgan Keegan & Co., Private Client Group "Tom Dorsey continues to be one of the foremost

authorities on Point and Figure charting. His relative strength analyses are essential for investors and traders alike. Furthermore, I always want to know what his NYSE Bullish Percent Indicators is "saying." - Lawrence G. McMillan, President, McMillan Analysis Corp., www.optionstrategist.com "Tom Dorsey has done it again... he has taken his 30-plus years of unending devotion, talents, and insights in technical analysis and applied them to Exchange Traded Funds. He begins with the history of ETFs, explains how different they are from mutual funds, and then applies his expertise in Point and Figure charting to help traders and investors time their purchases and sales." -

Ralph J. Acampora, CMT, Director of Technical research, Knight Capital "Reading Tom Dorsey's Point & Figure Charting is the like procuring a road map before you begin a journey. It's a comprehensive look at how to succeed in the markets. This book is not only essential but easy to follow for everyone." - Paulo Pinto, CEO, Dif Broker "Point and Figure Charting has become a valuable part of my daily trading routine. As an investment professional, it makes perfect sense to use Tom's methods in conjunction with fundamental analysis." - Damion Carufe, Investment Professional

The Truth About Day Trading Stocks

A Cautionary Tale About Hard Challenges and What It Takes To Succeed *John Wiley & Sons*

The Truth About Day Trading Stocks A realistic guide to day trading today's stock market In terms of the potential for heavy financial losses, day trading is a high-risk profession. No one should contemplate day trading without giving thought to the ways he can lose, and all the ways to lessen or avoid them. Yet many people enter the game with unrealistic expectations, unaware of what it takes to succeed. Seminars and software alone do not make a successful day trader, cautions author Josh DiPietro. Instead, a trader must learn hard lessons of self-

discipline, consistency, and staying in the game for the long haul to have a real chance of success. In *The Truth About Day Trading Stocks*, DiPietro offers the amateur day trader a brutally honest look at the pitfalls of day trading—and how to hopefully avoid them. Written in an engaging and sometimes humorous tone, *The Truth About Day Trading Stocks* draws on the author's own experiences as a day trader to offer a clear-cut departure from typical "golden goose" strategies promising instant wealth. Instead, he attempts to slow down the dangerous fervor of the average amateur and demonstrate the ways you can become a professional and not

lose your shirt in the process. *The Truth About Day Trading Stocks* shows how trading decisions are bent and shaped by emotions, and why it is critical to know yourself, understand risk, and remember that increasing your skill level is a gradual, ongoing process—there's always more to learn! After dispensing with popular illusions, DiPietro proceeds to offer realistic, practical trading advice—comparing pay-per-trade with pay-per-share brokers, determining which works best and when, offering suggestions on how to avoid the prospect of perfect trades turning ugly, and more. At the end of the book, he also includes a section

called "Rules to Remember," a list of over eighty rules, simply stated and easy to grasp, to benefit amateurs' performance.

Throughout the book, the author describes his development of acute self-awareness while figuring out how to succeed. Through that blunt self-portrayal, the goal of *The Truth About Day Trading Stocks* is to help you create a disciplined mind-set and apply it to your own successful trading style.

Evidence-Based Technical Analysis

Applying the Scientific Method and Statistical Inference to Trading Signals *John Wiley & Sons*

Evidence-Based Technical Analysis examines how you can apply the scientific method, and recently developed statistical tests, to determine the true effectiveness of technical trading signals. Throughout the book, expert David Aronson provides you with comprehensive coverage of this new methodology, which is specifically designed for evaluating the performance of rules/signals that are discovered by data mining.

Chart Reading for Professional Traders

This book is a complete, comprehensive study on reading charts, forecasting the markets, time cycles, and trading strategies. Explains reversal of

trends, when to expect them, and how to know the trend has changed. Shows you how to forecast with great reliability how long the new trend will last and its price target. As does *Geometry of Markets*, this book discusses in depth the Gann techniques of time and price. Progresses to the very advanced concepts of day trading with circular arc segments and calculating final high and low price targets. Each principle is demonstrated with numerous chart illustrations and real world applications. The information found in this book is unique with many of the techniques discovered personally by Mr. Jenkins and found nowhere else.

I'm Glad My Mom

Died *Simon & Schuster*

A heartbreaking and hilarious memoir by iCarly and Sam & Cat star Jennette McCurdy about her struggles as a former child actor—including eating disorders, addiction, and a complicated relationship with her overbearing mother—and how she retook control of her life. Jennette McCurdy was six years old when she had her first acting audition. Her mother's dream was for her only daughter to become a star, and Jennette would do anything to make her mother happy. So she went along with what Mom called “calorie restriction,” eating little and weighing herself five times a day. She endured extensive at-home makeovers while Mom

chided, “Your eyelashes are invisible, okay? You think Dakota Fanning doesn’t tint hers?” She was even showered by Mom until age sixteen while sharing her diaries, email, and all her income. In *I’m Glad My Mom Died*, Jennette recounts all this in unflinching detail—just as she chronicles what happens when the dream finally comes true. Cast in a new Nickelodeon series called *iCarly*, she is thrust into fame. Though Mom is ecstatic, emailing fan club moderators and getting on a first-name basis with the paparazzi (“Hi Gale!”), Jennette is riddled with anxiety, shame, and self-loathing, which manifest into eating disorders, addiction, and a series of unhealthy relationships. These issues only get worse when, soon after taking the lead in the *iCarly* spinoff *Sam & Cat* alongside Ariana Grande, her mother dies of cancer. Finally, after discovering therapy and quitting acting, Jennette embarks on recovery and decides for the first time in her life what she really wants. Told with refreshing candor and dark humor, *I’m Glad My Mom Died* is an inspiring story of resilience, independence, and the joy of shampooing your own hair.

American Psycho *Pan Macmillan*

A cult classic, adapted into a film starring

Christian Bale. Is evil something you are? Or is it something you do? Patrick Bateman has it all: good looks, youth, charm, a job on Wall Street, reservations at every new restaurant in town and a line of girls around the block. He is also a psychopath. A man addicted to his superficial, perfect life, he pulls us into a dark underworld where the American Dream becomes a nightmare. . . With an introduction by Irvine Welsh, Bret Easton Ellis's *American Psycho* is one of the most controversial and talked-about novels of all time. A multi-million-copy bestseller hailed as a modern classic, it is a violent black comedy about the darkest side of human nature.
