The three fundamental gas laws discover  
the relationship of pressure,  
temperature, volume and amount of gas.  
Boyle's Law tells us that the volume of  
gas increases as the pressure decreases.  
Charles' Law tells us that the volume of  
gas increases as the temperature  
increases. And Avogadro's Law tell us  
that the volume of gas increases as the  
amount of gas increases. The ideal gas  
law is the combination of the three  
simple gas laws.
