Field Theory: As we know, an electromagnetic field is comprised of electric and magnetic fields which are perpendicular to each other. These fields have different patterns for each mode. These patterns depend upon

the mode numbers (m and n) and the dimensions (' a ' and ' b ') of the waveguide.

Electromagnetic Field Theory Lab Manual

Welcome to the world of electromagnetics. Electromagnetic Field (EM) Theory is one of the fundamental courses for both Electrical and Electronics Engineering disciplines. Generally, students perceive it as a difficult course to understand and they feel that the course is abstract and too mathematical. It is essential to explain the involved theory in the course through real-life practical examples and visual aids.

Magnetic field produced by magnetic effect. Electric field produced due to electric changes. Moving charges produce a current. The

current carrying conductor produces a magnetic field. Thus, electric and magnetic field are related to each other. This field is called as electromagnetic field.
Q2: What is scalar and vector field?
