Each rung of the ladder spans from left to right and is executed from top to bottom by the PLC. As mentioned above, ladder logic is extremely popular among PLC programmers.

PLC Programming | How to Read Ladder Logic

These diagrams documented how connections between devices were made on relay panels; they are called “ladder” diagrams because they are constructed in a way that resembles a ladder with two vertical rails and rungs between them. The positive power rail (on the left) flows to the negative power rail (on the right) through the physical devices connected on the rung. The example below shows a ladder diagram with pushbuttons (PB), control relays (CR), a motor (M) and a light (L).
