ing functions of the gage. Magnification is fixed and cannot be affected by the setup process. To set up the gage, a master is placed on the mea-suring head (producing a back pressure). The zeroing knob is then adjusted to equalize the air pressure in the two channels. When this condition exists, the dial reads zero. No further adjustment is necessary.

Manual and computer numerical control (CNC) CMM operators sometimes try to use the CMM as a 2-D or 1-D height gage. In choosing a CMM for a measurement application, determination of the error budget often focuses on items such as vibration and temperature, but the effects of poor measurement techniques are often forgotten.
