use corrupted or imitation letters based on inscriptions appearing on Late Roman coins and medallions, which are presumably the models for the Scandinavian objects. While many of the inscriptions are readable — that is, we can identify individual runes and Roman letters — only a few of them are semantically interpretable.

Bracteate Inscriptions and Context Analysis in the Light ...

My Greek coins had great pictorial representations, but not so much in the way of inscriptions whereas my Roman coins seemed to be loaded with as much writing as they could possibly cram onto them. I don't know that there is anything of cosmic significance in noticing this but I was wondering if it indicates anything different about Greek versus Roman in terms of what was important to them.
