In The Art of the Metaobject Protocol, we are presented with the basic approach to metaobject protocols used by the authors, and then we are given a particular metaobject protocol for CLOS. CLOS is different from many other object-oriented languages in specifying that every Lisp object be an instance of some class.

A Review of The Art of the Metaobject Protocol

The CLOS metaobject protocol is an elegant, high-performance extension to the CommonLisp Object System.

The Art of the Metaobject Protocol ()

In computer science, a metaobject is an object that manipulates, creates, describes, or implements objects. The object that the metaobject pertains to is called the base object. Some information that a metaobject might define includes the base object's type, interface, class, methods, attributes, parse tree, etc. Metaobjects are examples of the computer science concept of reflection, where a system has access to its own internal structure. Reflection enables a system to essentially rewrite itself
