Calculating Power Answers - hostmaster.inca-ltd.org.uk

Here's the equation for power, P: W equals force along the direction of travel times distance, so you could write the equation for power this way: where θ is the angle between the force and the direction of travel. On the other hand, the object's speed, v , is just s / t (displacement over time), so the equation breaks down further to: In the special case where the force acts along the direction of travel, you have the simplified formula:
