Creativity, intelligence, and personality: A critical ...

Those that emphasise a person-centered view of creativity usually assess creativity with reference to personal attributes, like intelligence or personality (e.g. Guilford, 1950). There are also those who see creativity in an almost pathological light, i.e. as a result of unusual personality processes (Eysenck, 1993 , Eysenck, 1995).

Rex E. Jung, PhD, is an assistant professor of neurosurgery at the University of New Mexico, a research scientist at the Mind Research Network and a practicing clinical neuropsychologist in Albuquerque. His research is designed to relate behavioral measures, including intelligence, personality and creativity, to brain function.

Speaking of Psychology: The neuroscience of creativity

Creativity. Openness to experience correlates with creativity, as measured by tests of divergent thinking. Openness has been linked to both artistic and scientific creativity as professional artists and scientists have been found to score higher in openness compared to members of the general population. Intelligence and knowledge

Openness to experience - Wikipedia

Scholarly interest in creativity is found in a number of disciplines, primarily psychology, business studies, and cognitive science, but also education, the humanities, technology, engineering,

philosophy (particularly philosophy of science), theology, sociology, linguistics, the arts, economics, and mathematics, covering the relations between creativity and general intelligence, personality ...

Creativity - Wikipedia

Correlation among Variables Entrepreneurship Achievement (EA) Creativity Level (CQ) 0.074 ($p = 0.106$) not significance Intelligence Level (IQ) 0.072 ($p = 0.113$) not significance Personality Level (PQ) 0.152 ($p = 0.005$) significance Research shows that creativity alone has no significant correlation or direct impact to the entrepreneurship achievement.

Correlations Creativity, Intelligence, Personality, and ...

There is an extensive psychological literature on the three variables (Creativity, Intelligence, and Personality) that are the topic of this chapter. Although once all thought of as part of differential psychology, researchers in these different areas seem to have gone their own ways, as observed in the academic journals.

Individual Differences in Intelligence, Personality, and ...

Creativity is a complex construct that is conceptualized and measured in multiple ways. This study examined the relationship between creativity and personality taking this into account. It was hypothesized that applying different conceptions and measures would cause variation in the creativity-personality relationship.
