Conservation Biology Introduction | Shmoop

Conservation strategies vary at the different levels. At the species level, scientists first try to estimate how many individuals there are. Since animals and plants don't mail their census forms in, scientists have to go out and count them. Usually biologists estimate population size, and they can do so a couple different ways.

Biodiversity can be divided into organismal diversity (species, genera, and so on), ecological diversity (populations, communities, habitats, ecosystems and biomes) and genetic diversity (nucleotides, genes, chromosomes, genomes, individuals and populations). 2. Invasive species can threaten native species through hybridization, but sometimes conservation biologists purposely hybridize endangered species with other species or subspecies, like the Florida and Texas panthers.
