Interpreting Accounting Information for Decision-Making Wiley

Accounting for Managers explains how accounting information is used by non-financial managers. The book emphasises the interpretation, rather than the construction, of accounting information and encourages a critical, rather than unthinking acceptance, of the underlying assumptions behind accounting. It links theory with practical examples and case studies drawn from real life business situations in service, retail and manufacturing industries.

Accounting: Information for Business Decisions *Cengage AU*

Accounting Information for Business Decisions is a business-focused introduction to Accounting for all students - not just those intending to be Accounting majors. Lead students through the real-world business cycle and how accounting information informs decision-making. Departing from the traditional approach taken by other introductory accounting textbooks, students apply both managerial and financial approaches within the topics examined in each chapter, to see the direct impact that Managerial Accounting decisions make on the Financial Accounting processes (and vice versa). The conversational writing engages students in the theoretical content and how it applies to contemporary real-world scenarios. Students follow a retail coffee business in the relatable Cafe Revive running case study integrated into every chapter, to learn about applying accounting issues in the real world. Now in its third edition, the primary goal of Ingram/Baldwin remains the same -- to teach students to understand a company's financial statement information. This unique organization, introducing students to how a business uses accounting information and then focusing on activities of the firm, engages students with the type of financing, investing and operating decisions that a firm has to make. This approach is especially ideal for students who will become users of accounting information because concepts, not procedures, are emphasized.

Managerial Accounting

Information for Decisions *South-Western Pub*

Unlike any other text, Ingram presents managerial accounting as a crucial communication tool for management decision making. Additionally, students learn that service-oriented and product-oriented organizations apply similar approaches to gain accurate, timely information. Throughout the book, managerial accounting is viewed as a key component of multi-disciplinary management-with accountants working as part of a team to resolve questions of costing, pricing, and production.

Accounting Information Systems for Decision Making *Springer Science & Business Media*

This book contains a collection of research papers on accounting information systems including their strategic role in decision processes, within and between companies. An accounting system is a complex system composed of a mix of strictly interrelated elements such as data, information, human resources, IT tool, accounting models and procedures. Accounting information systems are often considered the instrument by default for accounting automation. This book aims to sketch a clear picture of the current state of AIS research, including design, acceptance and reliance, value-added decision making, interorganizational links, and process improvements. The contributions in this volume emphasize that AIS has grown into a powerful

strategic tool. The book provides evidence for this observation by examining a wide range of current issues ranging from theory development in AIS to practical applications of accounting information systems. In particular it focuses on themes of growing interest in the realm of XBRL and Financial Reporting, Management Information Systems, IT/IS Audit and IT/IS Compliance. The book will be of interest to financial and managerial accountants and IT/IS practitioners, including information systems managers and consultants.
