Cardiac Catheterization Laboratory Cath Lab

A cath lab has special imaging equipment used to see the arteries and check how well blood is flowing to and from the heart. This information helps the care team to diagnose and treat blockages and other problems in the arteries. Who Works in a Cath Lab?

Interventional cardiologists are heart doctors who specialize in treating cardiovascular disease and who have had one to two years of education and training specifically in the use of catheters to perform cardiovascular procedures.

What Is a Cardiac Catheterization Lab?

Cardiac catheterization is a general term

for a group of procedures that are performed in the cath lab, such as coronary angiography. Once a catheter is in place, it can be used to perform a number of procedures including angioplasty , PCI (percutaneous coronary intervention) angiography, transcatheter aortic valve replacement , balloon septostomy , and an electrophysiology study or catheter ablation .

Cath lab - Wikipedia

The Cardiac Catheterization Laboratory offers treatment for children, including infants, at Mayo Clinic's campus in Minnesota. Staff includes specialists trained in treating children with heart conditions (pediatric cardiologists). Treatment for adults is offered at the

Cardiac Catheterization Laboratory at Mayo Clinic's campuses in Arizona, Florida and Minnesota. After treatment, you'll have the option of continuing your care with a Mayo Clinic doctor, or you may return to your own doctor.

Cardiac Catheterization Laboratory - Overview - Mayo Clinic

The catheterization laboratory procedure room should provide ample space for the equipment, in-room storage and movement of the patient into and out of the room via stretcher or patient bed. The American College of Cardiology recommends 500-600 square feet for the procedure area and 150-200 square feet allotted to the control room.

Cardiac Catheterization Laboratory

... - Cath Lab Digest

A catheterization lab is a special room in a medical setting equipped with technology to aid in the catheterization process. Often referred to as a cath lab, a catheterization laboratory is commonly used for cardiac catheterization, in which a tube is placed in the heart to access coronary circulation. Most catheterization labs have two major types of equipment: an X-ray machine and an image magnifier.

What is a Catheterization Lab? (with pictures)

The cardiac catheterization laboratories, or cardiac cath labs, at Froedtert Hospital and Froedtert Menomonee Falls Hospital are used to diagnose and treat patients with acute coronary disease and

heart attack.

Cardiac Catheterization Laboratory, Cath Lab
