Heading Home

Motherhood, Work, and the Failed Promise of Equality *Columbia University Press*

Women in today's advanced capitalist societies are encouraged to "lean in." The media and government champion women's empowerment. In a cultural climate where women can seemingly have it all, why do so many successful professional women—lawyers, financial managers, teachers, engineers, and others—give up their careers after having children and become stay-at-home mothers? How do they feel about their decision and what do their stories tell us about contemporary society? *Heading Home* reveals the stark gap between the promise of gender equality and women's experience of continued injustice. Shani Orgad draws on in-depth, personal, and profoundly ambivalent interviews with highly educated London women who left paid employment to take care of their children while their husbands continued to work in high-powered jobs. Despite identifying the structural forces that maintain gender inequality, these women still struggle to articulate their decisions outside the

narrow cultural ideals that devalue motherhood and individualize success and failure. Orgad juxtaposes these stories with media and policy depictions of women, work, and family, detailing how—even as their experiences fly in the face of fantasies of work-life balance and marriage as an egalitarian partnership—these women continue to interpret and judge themselves according to the ideals that are failing them. Rather than calling for women to transform their feelings and behavior, *Heading Home* argues that we must unmute and amplify women's desire, disappointment, and rage, and demand social infrastructure that will bring about long-overdue equality both at work and at home.

Amazing Me :.

Parenting Matters

Supporting Parents of Children Ages 0-8 *National Academies Press*

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a

child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a

roadmap for the future of parenting policy, research, and practice in the United States.

Raising Henry

A Memoir of Motherhood, Disability, and Discovery *Yale University Press*

Rachel Adams's life had always gone according to plan. She had an adoring husband, a beautiful two-year-old son, a sunny Manhattan apartment, and a position as a tenured professor at Columbia University. Everything changed with the birth of her second child, Henry. Just minutes after he was born, doctors told her that Henry had Down syndrome,

and she knew that her life would never be the same. In this honest, self-critical, and surprisingly funny book, Adams chronicles the first three years of Henry's life and her own transformative experience of unexpectedly becoming the mother of a disabled child. A highly personal story of one family's encounter with disability, "Raising Henry" is also an insightful exploration of today's knotty terrain of social prejudice, disability policy, genetics, prenatal testing, medical training, and inclusive education. Adams untangles the contradictions of living in a society that is more enlightened and supportive of people with disabilities than ever before, yet is racing to perfect prenatal tests to prevent children like Henry from being born. Her book is gripping, beautifully written, and nearly impossible to put down. Once read, her family's story is impossible to forget.

This authoritative and accessible book answers these and many other questions. Based on Dr. Maria Montessori's instructions for raising infants, its comprehensive exploration of the first three years incorporates the furnishings and tools she created for the care and comfort of babies. From the design of the baby's bedroom to the child-sized kitchen table, from diet and food preparation to clothing and movement, the authors provide guidance for the establishment of a beautiful and serviceable environment for babies and very young children. They introduce concepts and tasks, taking into account children's "sensitive periods" for learning such skills as dressing themselves, food preparation, and toilet training. Brimming with anecdote and encouragement, and written in a clear, engaging style, *Montessori from the Start* is a practical and useful guide to raising calm, competent, and confident children.

The Mama Natural Week-by-Week Guide to Pregnancy and Childbirth

Simon and Schuster

"Mama Natural's Week to Week Guide to Pregnancy is the modern (and yet ancient) approach to pregnancy and childbirth. "Natural" recognizes that pregnancy and birth are normal, and that having a baby is a wondrous biological process and rite of passage--not a medical condition. This book draws

upon the latest research showing how beneficial and life-changing natural birth is for both babies and moms. Full of weekly advice and tips for a healthy pregnancy, Grace details vital nutrition to take, natural remedies for common and troublesome symptoms, as well as the appropriate (and inappropriate) use of interventions. Pregnancy, childbirth, health, health and wellness, parenting, family"--

It's You and Me Against the Pee and the Poop Too *National Center for Youth Issues*

Meet Stanley...an energetic three-year-old who has not quite mastered using the potty. Stanley is way too busy playing to stop having fun. He would rather hop, skip and wiggle than get the job done. Then Stanley learns a new game called You and Me Against the PEE...and Me and You Against the POOP! Armed with a powerful secret for potty-training success and eager to play, Stanley proudly transforms into a Potty Expert. This fun and colorfully illustrated book will turn all kids into Potty Experts while providing grown-ups with an important reminder that potty learning can and should be a team effort.
