...

October 16, 2018 On behalf of the team and everyone that

contributed, it is my pleasure to announce that Spring Boot 2.0.6 has been released and is now available from [repo.spring.io](https://repo.spring.io) and Maven Central. Spring Boot 2.0.6 includes 97 fixes, improvements, and dependency updates as well as a Spring Framework CVE report.

**Spring Boot 2.0.6**

Spring Boot contains a comprehensive infrastructure support for developing a micro service and enables you to develop enterprise-ready applications that you can “just run”.

Audience This tutorial is designed for Java developers to understand and develop production-ready spring applications with minimum

configurations.

### **Spring Boot Tutorial - Tutorialspoint**

Spring Boot 2.0 supports Java version 8 and greater only. It is one of the few options available where you can use the latest Java 9. The Gradle plugin is replaced by BootJar and BootWar. The dependency management plugin is no longer activated automatically. It's far more secure. Reactive models have new starters of different types, such as WebFlux.

### **Mastering Spring Boot 2.0 - Packt**

In fact, just about every autoconfigured component has some property setting (<http://docs.spring.io/spring-boot/docs/2.0.0.M5/ref>

[erence/htmlsingle/#common-application-properties](#)) allowing you to override just the parts you like. Many of these autoconfigured beans will back off if Boot spots us creating our own. For example, when Spring Boot spots reactive MongoDB drivers on the classpath, it automatically creates a reactive MongoClient.
